Evaluation Study

- ADOT & MAG funded 3-Yr Pilot Project
  - Co-location of DPS troopers at the TOC started in October 2014
  - 3-months of staff training
  - The program fully operational in January 2015

- All crash clearance data gathered using the DPS electronic reporting system - TraCS

- Evaluation compared 9-months of BEFORE Vs AFTER performance data:

  Jan-Sept 2014 Vs Jan-Sept of 2015

Estimated Economic Benefit to MAG Region

- Regional Traffic Simulation Model -DynusT
  - Compared total traffic delay experienced by travelers in 2014 & 2015
  - Used observed crash numbers & actual time taken to clear crashes

- Estimated Traffic Delay
  - Traffic delay experienced by travelers in 2015 was reduced by nearly **8.4 million vehicle-hours**
  - Equivalent to **$165 million** in savings
  - Does not include potential savings from secondary crashes reduced

- Cost of the program: $450,000 in Year 1, $425,000/Yr in Years 2 & 3

Summary

- Despite a 23% increase in the number of freeway crashes, the time to clear all freeway lanes at crash sites have been **reduced by nearly one-hour**

- Overall savings due to reduced traffic delay during 2015 is estimated at $165 million

- Year#1 Benefit:Cost = 368:1
