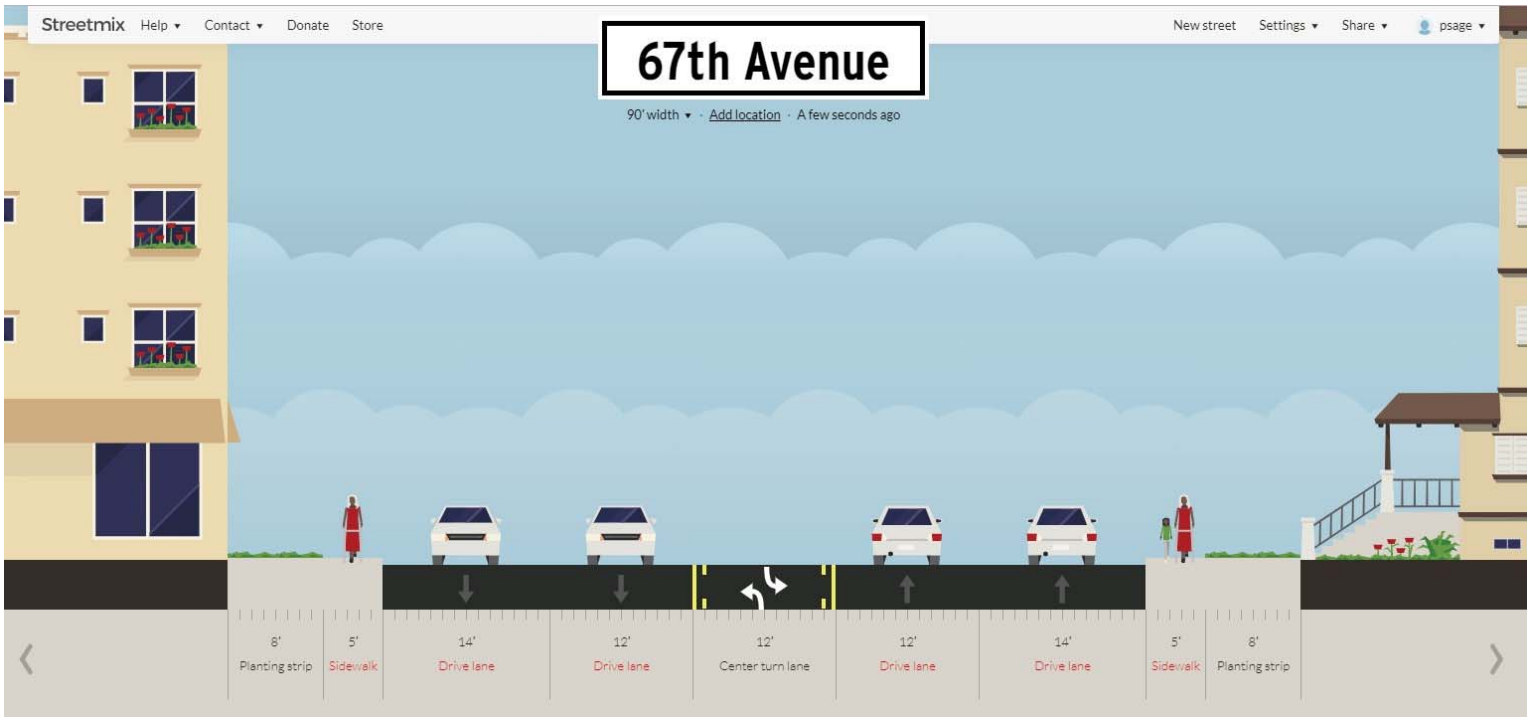
67th Avenue Bike Lanes – North Project

Photo 1 – 67th Ave just north of Orangewood Ave, looking north. Note the space available to define a bike lane between the car and the gutter

Photo 2 – 67th Ave connector to Grand Avenue, looking northeast across Grand Ave. The project will evaluate enhancing the existing pedestrian crossing at Grand Ave to also accommodate bicyclists.

Photo 3 – 67th Ave just north of Peoria Ave, looking north. The existing striped shoulder is not wide enough to designate as a bike lane.

Photo 4 – Looking east along Cholla Street (north project terminus) where the new bike lanes on 67th Ave will connect with these existing bike facilities.

67th Avenue Bike Lanes – North Project
Basic Cross Section


The 67th Avenue cross section below provides a sample existing cross section for the street. This section shows a 90 foot right of way width (front of building to the front of porch).
