PART B-PROJECT DESCRIPTION																					
<p>This part of the form identifies the current characteristics and proposed improvements for each project.</p> <p>The purpose of Part B is to provide sufficient information to evaluate the cost estimate for the project and to provide assurance that the project will be capable of meeting the ADOT administered federal design review and clearance process. This process requires environmental, ROW and utilities clearances and a bid ready design prior to FHWA approval to encumber federal funding for construction.</p> <p>NOTE: For Part B, Questions 12-13 and 15-18, the specified distance will vary (and update automatically) depending on the project type identified in Part B, Question 1. Pedestrian-only projects will use a distance of 1/4 mile, while bicycle and Shared-Use projects will use a distance of 1/2 mile.</p>

<p>3. Please describe the existing condition of the project site and any problem(s) being addressed.</p> <div style="border: 1px solid black; padding: 5px; min-height: 100px;"> <p>The existing pedestrian environment of 3rd Street Promenade is influenced by two distinct development patterns, pre-WWII and post-WWII. The pre-WWII development consists of a development pattern with wider sidewalks, planting strips, buildings fronting the street, narrower travel lanes and neighborhoods supported by local businesses. Post-WWII development consists of a development pattern reflecting a higher reliance on vehicles. Sidewalks were placed at the back of curb and in some instances were never constructed, larger building setbacks, multiple business access points, parking lots fronting the street, and neighborhood development which faced inward rather than engaging the corridor. This resulted in different pedestrian environments, with the south study area generally having a more pedestrian-friendly environment and the north being less pedestrian-friendly with a focus on vehicular movement. Strong connections exist between 3rd Street Promenade and adjacent neighborhoods. However, connectivity between neighborhoods across from each other along 3rd Street Promenade is limited.</p> </div>																					
<p>4. Please describe the work being done and improvements being made as part of this project.</p> <div style="border: 1px solid black; padding: 5px; min-height: 100px;"> <p>A high priority has been placed on developing the 3rd Street Promenade into a fully walkable street that protects the character of existing neighborhoods, historic districts, business entities, and creates a comfortable pedestrian environment. Sidewalks will be widened and constructed in places where they do not exist to allow for continuous pedestrian circulation. Directional sidewalk ramps will be incorporated at all intersections and brought up to current ADA standards. This will also include the integration of new traffic signals at selected locations and the removal of some utility barriers that impede pedestrian activity. In summary, this project focuses primarily on the improvements that could be made to enhance the pedestrian experience along the corridor.</p> </div>																					
<p>5. What do you hope to achieve with this project?</p> <div style="border: 1px solid black; padding: 5px; min-height: 100px;"> <p>As downtown Phoenix continues to redevelop, spurred on by the completion and early success of the light rail and the success of the downtown ASU campus, 3rd Street Promenade is an excellent opportunity to strengthen pedestrian connectivity and create a walkable corridor that links neighborhoods, businesses, and places of interest. This signature corridor provides a strong connection to the Roosevelt Street improvements slated for construction in May of 2014 and acts a prime example of a phased development of a complete street tying to the efforts undertaken by the City of Phoenix. Third Street (McDowell Road to Buckeye Road) is also an important corridor in the Downtown Phoenix Comprehensive Transportation Study that will provide an alternate north-south connection with the growing downtown. Improvements for safe, continuous pedestrian circulation are key to this project.</p> </div>																					
<p>6. Please provide a site safety / crash history, and provide a source for this information.</p> <p>Please describe any car-bicycle and car-pedestrian crashes on streets within 2-mile radius of the project (within the last 5 years). You may attach crash reports or summarize their results below.</p> <div style="border: 1px solid black; padding: 5px; min-height: 100px;"> <p>From 2008 - 2012 there were 897 pedestrian and bike crashes within two miles of this segment. Of those, 799 resulted in an injury and 29 in a fatality. 137 pedestrians and bicyclist were children under the age of 18 and 70 of those hit during school hours. 640 males and 255 females were struck (2 person's gender was unknown.) 635 of these collisions were reported during daylight leaving 262 occurring at night or twilight.</p> </div>																					
<p>7. PART B-PROJECT DESCRIPTION

8. How does this project improve upon an existing safety issue?

Connectivity between neighborhoods across from each other along 3rd Street Promenade is limited. These restrictions cause 3rd Street to act as a barrier between neighborhoods. This is especially apparent around Oak Street which connects Monterrey Park Elementary School and St. Mary's High School with 3rd Street Promenade and 7th Avenue to the east. Many of these students walk from the Encanto LRT station or bus stops and do not have a dedicated crossing or connecting ADA ramps and these locations. Most intersections throughout the corridor have sidewalk ramps at all corners, except at Weldon Street on the west side, the northwest corner of Mitchell Street, Alvarado Road, and Monte Vista Road. Ramps tend to be diagonal and do not have detectable warning pavers incorporated into the ramps. There are numerous driveway crossings which interrupt pedestrian circulation and don't use current standards. In addition to discontinuous and narrow sidewalks, there are numerous utility obstructions which interrupt the pedestrian space and make an area difficult to travel through. These specific problem areas will need to be viewed individually to see if minor modification can be made to enhance the safety of pedestrians.

9. How does the project improve ADA facilities for persons with disabilities?

Most intersections throughout the corridor have sidewalk ramps at all corners, except at Weldon Street on the west side, the northwest corner of Mitchell Street, Alvarado Road, and Monte Vista Road. However, many of the ramps are not constructed up to current standards and tend to be diagonal with no detectable warning pavers incorporated into the ramps. At Thomas Road and McDowell Road, the pedestrian ramps are constructed with concrete pavers. There are numerous driveway crossings throughout the corridor which interrupt pedestrian circulation. When these are located in areas with planting strips, the sidewalk remains level, with driveway ramping up to sidewalk level in the planting strip width. However, when there is no planting strip, driveway crossings are incorporated into the sidewalk width and have excessive cross slopes which do not meet ADA standards. Upgrades to the ADA ramps at all intersections, selected driveway slopes and installation or repair of missing or broken sidewalks will occur through this project.

10. How does the project create a sense of place?

High priority has been placed on developing the 3rd St. Promenade into a fully walkable street that protects the character of existing neighborhoods, historic districts, business entities, and creates a comfortable pedestrian environment. Improvements will help create a stronger pedestrian corridor along 3rd S. and lay the groundwork for future phases of improvement moving toward a complete street. As downtown Phoenix continues to redevelop, spurred on by the completion and early success of the light rail and the success of the downtown ASU campus, 3rd St. Promenade is an excellent opportunity to strengthen pedestrian connectivity and create a walkable corridor that links historic neighborhoods, businesses, and places of interest. This signature corridor provides a strong connection to the Roosevelt Street improvements slated for construction in May of 2014 and acts a prime example of a phased development of a complete street tying to the efforts undertaken by the City of Phoenix. 3rd St. (McDowell Road to Buckeye Road) is also an important corridor in the Downtown Phoenix Comprehensive Transportation Study that will provide an alternate north-south connection with the growing downtown.

11. Connectivity: (Check all that apply)

- Project fills a gap in the system
Explain:
Sidewalks exist throughout much of the corridor, but are absent in a few locations; approximately 340 feet north of Palm Lane on the west side, 140 feet north of Virginia on the west side, 110 feet south of Alvarado on the west side, and several small areas at minor intersections such as Monte Vista Road. The project will also provide a link to existing pedestrian improvements in the corridor as well as the Roosevelt Streetscape Project.
- Project connects to other local bikeways
List of connected bikeways:

- Multi Jurisdictional Project
List of Participating Jurisdictions:

- 2 Total length of facilities connected by this project (in miles)

12. Number of transit stops this project will connect to. Do NOT count major transit facilities (park and rides, transit centers, etc.) in this question. List associated route(s) and their peak frequency, using Valley Metro as the source.

- 56 Within 1/4 mile
List routes and frequency:
Route 29 (Thomas Road) – Every 10 minutes (Peak)
Route 17 (McDowell Road) – Every 15 minutes (Peak)
Route 10 (Roosevelt Street) – Every 30 minutes
Route 7 (7th Street) – Every 20 minutes (Peak)
Route 0 (Central Avenue) – Every 10 minutes (Peak)
Light Rail Transit Route (Central Avenue) – Every 12 minutes (Peak)

13. Number of major transit facilities (park and rides, transit centers, etc.) served by this project:

- 4 Within 1/4 mile
List:
Four LRT stations (Thomas Road, Encanto Boulevard, McDowell Road, Roosevelt Street)

14. Describe how this project will improve access from nearby neighborhoods and/or adjacent uses:

Strong connections exist between the Third Street and adjacent neighborhoods and other land uses. However, connectivity between neighborhoods across from each other along Third Street is limited. Signalized intersections occur at approximately 1/4-mile intervals, except at Oak Street which is not signalized. The restricted crossing opportunities for pedestrians causes Third Street to act as a barrier between neighborhoods and limits access to important community and medical facilities as well as small businesses. Several major destinations, such as regional and neighborhood parks, museums, library, retail and commercial businesses, and schools, exist along the corridor or within a 1/4 mile radius of the project site. Direct and more defined circulation patterns as well as ADA enhancements and improved, unimpeded sidewalks are key elements in access between land uses in the project area for all members of the community.

<div style="border: 1px solid black; padding: 2px;"> Once completed, improvements will be incorporated into the City of Phoenix Street Transportation Department maintenance and repair program specifically within public right-of-way. </div>	
31. How will the applicant measure the success of this project?	
<div style="border: 1px solid black; padding: 2px;"> Success of this project will be measured qualitatively by public opinion and quantitatively by manual or tube counts (for bike, ped and vehical traffic) when appropriate. </div>	
32. Will bicycle/pedestrian count technology be incorporated? Will the devices broadcast automatic updates or require manual data collection? If manual, how will the agency identify staff resources to dedicate to collecting the data?	
<div style="border: 1px solid black; padding: 2px;"> In general, no bike or pedestrian technology will be incorporated. Manual, tube or video counts can be done if deemed necessary. </div>	
33. Will the project include an education/marketing component upon completion of construction, to publicize the project and increase citizen awareness of the project impact and benefits? If yes, please describe below.	
<div style="border: 1px solid black; padding: 2px;"> Generally, the City of Phoenix invites surrounding, impacted residents and businesses to public meetings so that they can learn about the purpose of the project and schedule. During the public meeting, general questions and comments are addressed. Many times, ribbon cutting ceremonies are also held for high profile community-based projects which also help increase citizen awareness. </div>	

Part C - Required Attachments

Listed below are the required attachments for this project application. These attachments are intended to demonstrate the need of the project. They should clearly show the segment alignment and features that connect to other bicycle, pedestrian, and/or shared-use facilities, as well as washes, canals, railroad crossings, and other crossing features that may affect the project.

PLEASE INCLUDE EACH ATTACHMENT AS A SEPARATE .JPEG OR .PDF FILE ON YOUR APPLICATION CD.

Please insert ALL attachments between Part B and Part D on your printed application, in the order they are listed below. See below for alternate submission requirements for GIS coverage files.

Required Attachments:

1) Please attach a map with streets labeled showing the location(s) of the proposed project, including a north arrow.

2) Please attach up to four photos indicating existing conditions in the project area (two 4x6 photos per page).

3) Please attach a simple diagram of the current typical cross section, including widths, of the segment that shows the right of way limits, sidewalks and shoulders (if any), and the lanes of travel.

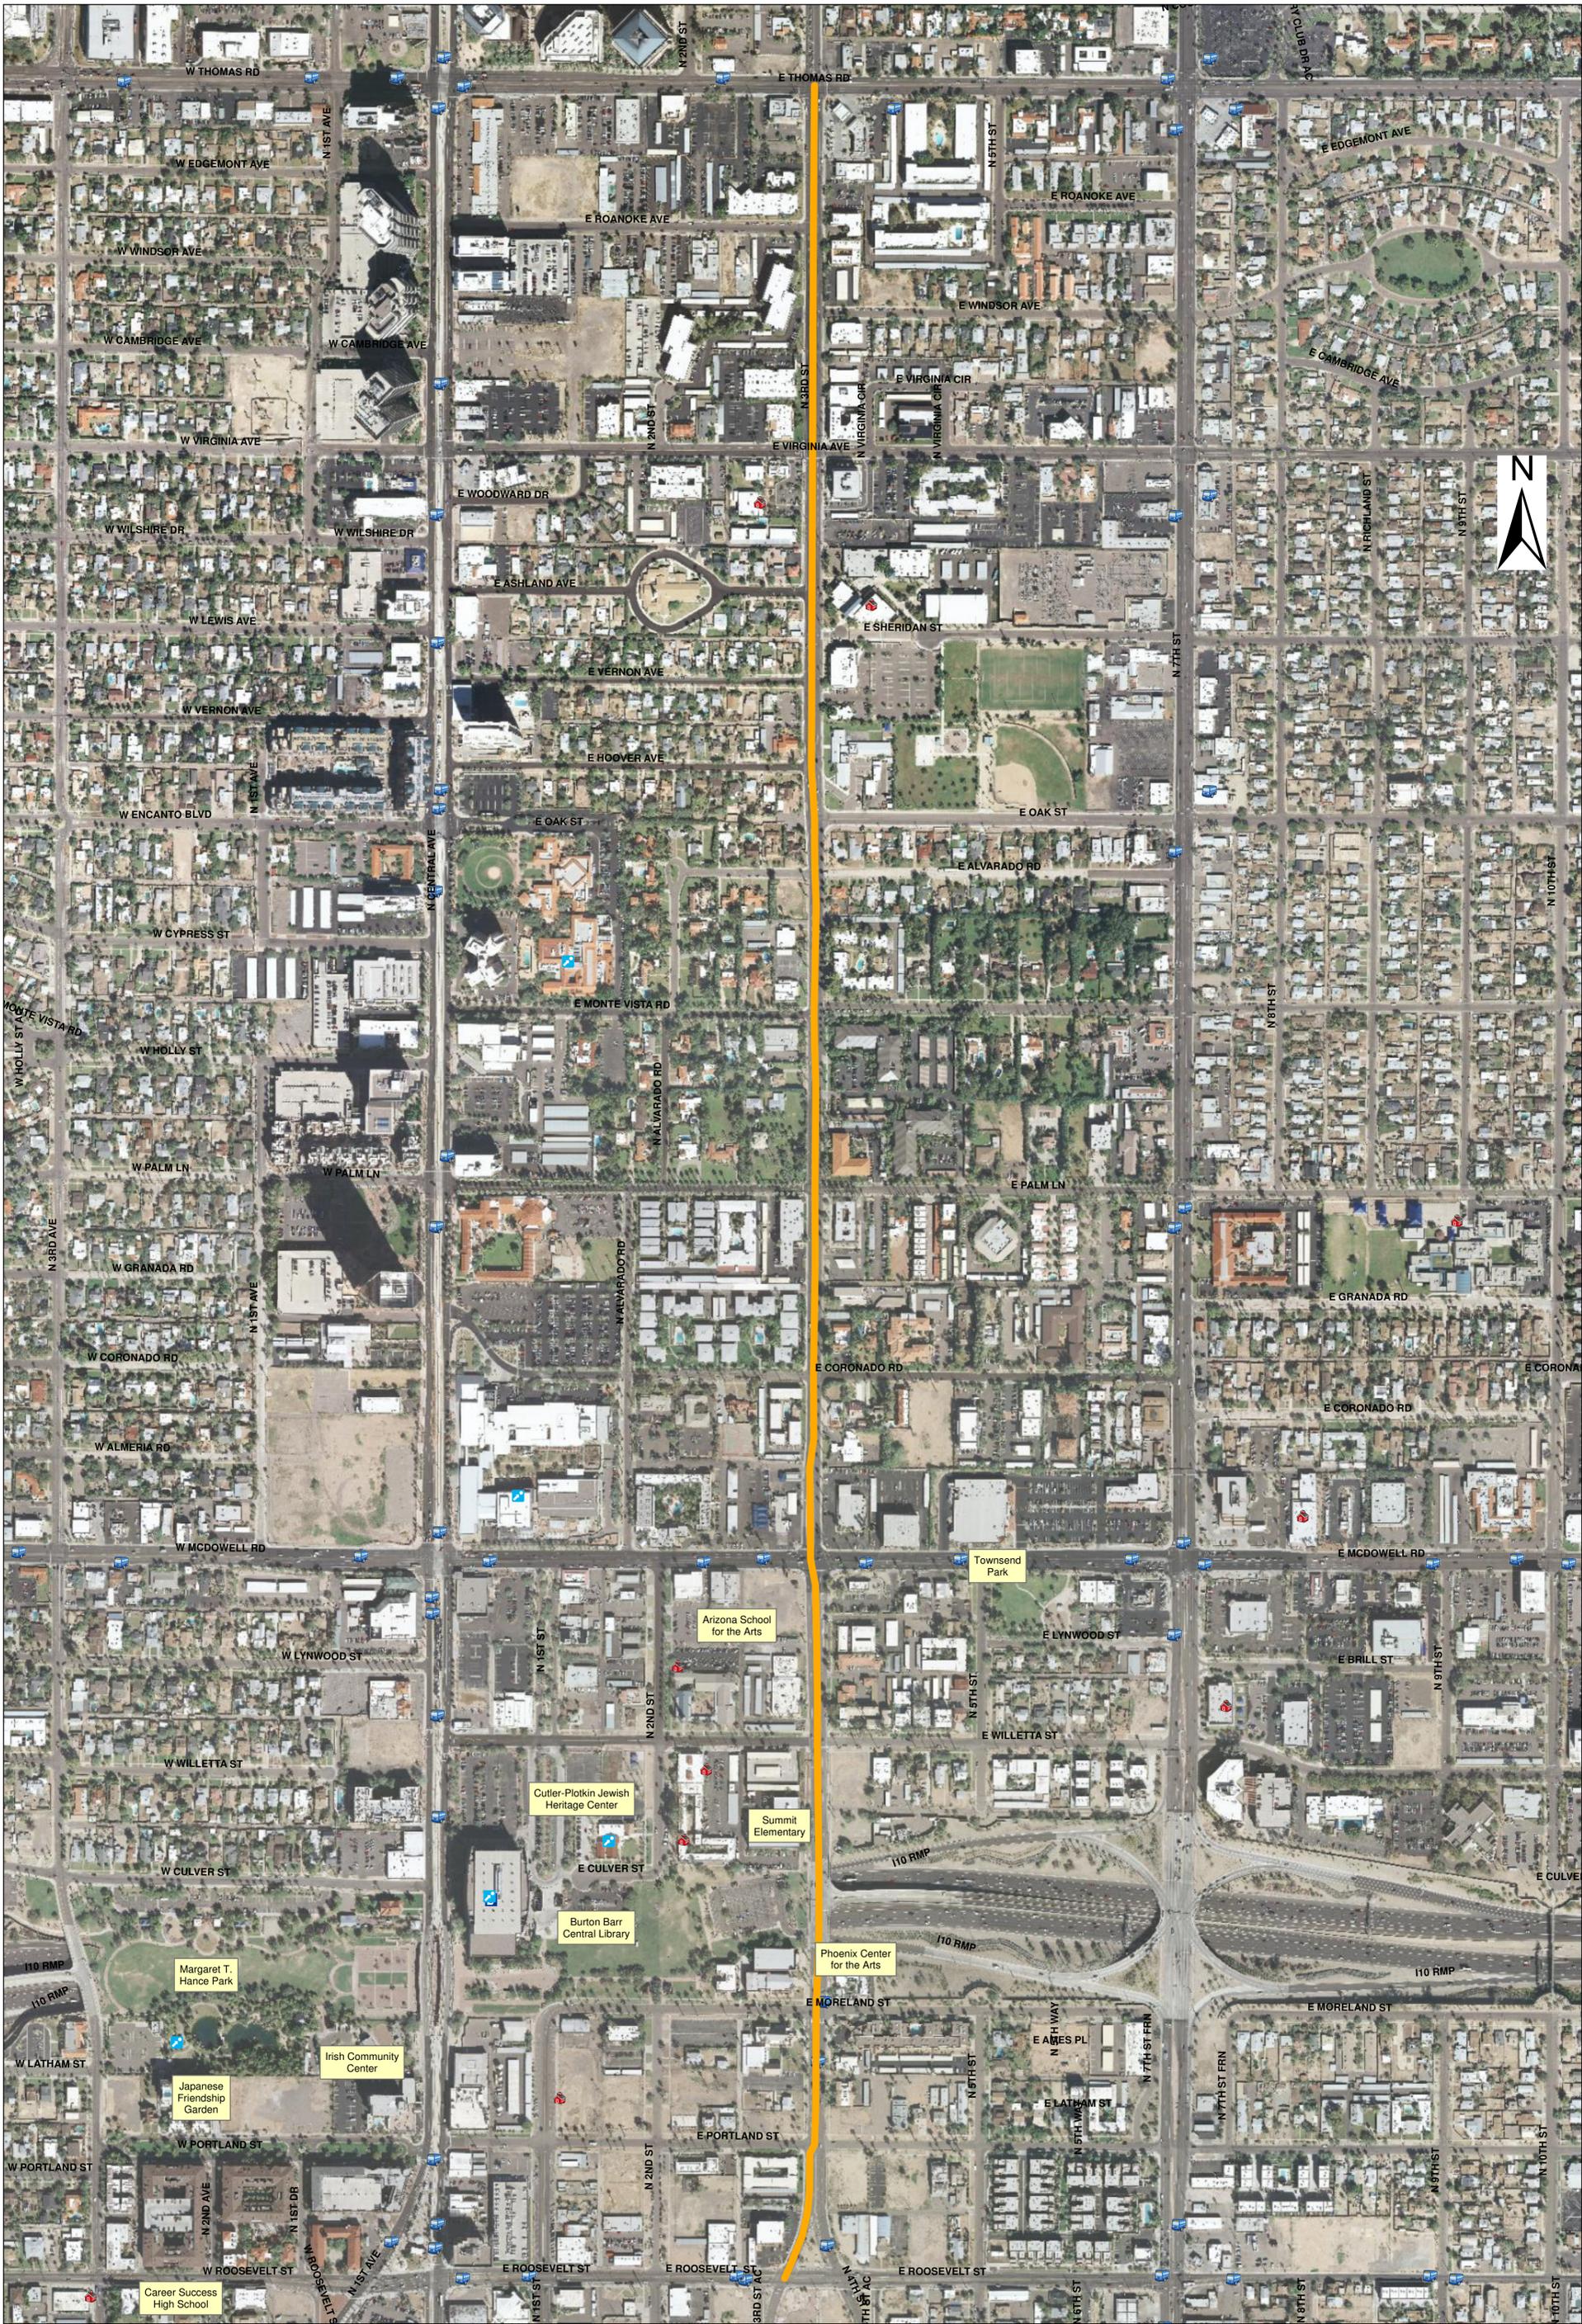

OPTIONAL Attachments:

(OPTIONAL) Attach up to two photos showing what the completed project will look like, if available (these can be photoshop, renderings, etc.).

(OPTIONAL) Attach any crash report(s) referenced in Part B, Section 2, #6.

(OPTIONAL) If the applicant will be providing a GIS coverage (shapefile or geodatabase), please see the tab labeled "GIS Transmittal Instructions"

PART E - TOTAL PROJECT SCHEDULE AND BUDGET INCLUDING ALL SEGMENTS

Please verify that the cost and programming estimates for the total project are correct below. The numeric values on this sheet (in GREY) are automatically populated from the cost estimate sheet (Part D) and cannot be modified. If there are any errors in the numeric values on this sheet, please verify and correct the numbers you have entered into the cost estimate sheet (Part D). You MUST fill in the GREEN portions of Part E manually.

The design for the project should be programmed at least 1 year, preferably 2 years, prior to construction. Utilities and right of way should be programmed at least 1 year prior to construction, but may occur in the same year as construction depending on utility and right of way concerns that are identified in questions 23-26 in Part B.

Cost Estimate for the Project Including ALL Segments	Cost	Additional Notes (if needed)			
1. ADOT Fee	\$20,000				
2. Design	\$213,000				
3. Right of way	\$15,000				
4. Utilities	\$74,050				
5. Construction	\$2,126,383				
6. Total Cost	\$2,448,433				
7. Will the agency maintain the improvement after it is completed?		Yes			
8. Expected Annual Maintenance Cost		1,500			
9. Identify Source of Maintenance Funds		Street Maintenance Operating Budget

PART F - SIGNATURE AND CHECKLIST

Checklist

This checklist is included to facilitate applicant review and verification that all required fields in the form have been completed.

COVER SHEET	Complete?
Cover Sheet is completely filled out	Yes
PART A - Contacts and Project Description Fields	Complete?
Contact Information, fields 1 – 5 are complete	Yes
Project Description, fields 6 - 8 are complete	Yes
Safe Routes to School, fields 9-12 are complete (if applicable)	Yes
PART B - Project Description	Complete?
Fields 1 - 11 (Project Description) are complete	Yes
Fields 12– 14 (Transit and Access) are complete	Yes
Fields 15 – 19 (Attractors and Demographics) are complete	Yes
Fields 20 – 26 (Traffic, Environmental, ROW, and Utilities) are complete	Yes
Fields 27 – 29 (Guidelines, Policies, and Plans) are complete	Yes
Fields 30 – 33 (Maintenance and Performance Measurement) are complete	Yes
PART C - Required Attachments	Complete?
Field 1 - Project map is provided in the printed application and the PDF application	Yes
Field 2 - Up to 4 photos of existing conditions are provided in the printed application and the PDF application (two 4x6 per page).	Yes
Field 3 - Cross-section(s) provided in the printed application and the PDF application.	Yes
(OPTIONAL)- Up to 2 photos/renderings of the completed project are provided in the printed application and the PDF application.	No
(OPTIONAL) - Crash report(s) are provided in the printed application and the PDF application	No
(OPTIONAL) - GIS coverage (shapefile or geodatabase) is provided on the CD with the application.	No
PART D - Cost Estimate Worksheet	Complete?
Sponsoring Agency, Project Title, and Application Date are complete	Yes
Part A - Scoping is complete	Yes
Part B - Final Preliminary Engineering Design is complete	Yes
Part C - Right-of-Way Acquisition is complete	Yes
Part D - Utility Relocation is complete	Yes
Part E - Construction or Implementation is complete	Yes
Parts F, G, and H - Costs are complete and accurate	Yes
PART E - Total Project Schedule and Budget Including All Segment Fields	Complete?
Fields 1 – 6 are complete and costs are accurate	Yes
Field 7 - 9 are complete	Yes
Fields 10 – 13 Years are complete	Yes
Fields 10 – 13 Local Funding Sources are complete	Yes
Fields 10 – 13 Local Costs are complete and accurate	Yes
Field 10 - 13 Federal Costs are complete and accurate	Yes
Field 14 Total Costs are complete and accurate	Yes
PART F - Signature and Checklist	Complete?
Entire checklist is completed.	Yes
Form is signed by MAG member agency's manager/administrator or designated representative.	Yes
Name, title and date fields under the signature are completed.	Yes
(SAFE ROUTES TO SCHOOL PROJECTS ONLY) - Additional signatures and related name, date, and title are completed.	

SIGNATURE(S):

As the MAG member agency's *manager/administrator or designated representative*, I certify that this application is accurate and complete and that the project will be included in the sponsoring MAG member agency's local CIP/TIP if the project is selected for federal funding.
