

NACTO Urban Design Guidelines 2013

City of Phoenix

Interim Design Strategies

With limited funding streams, complex approval and regulatory processes, and lengthy construction timetables, cities are often challenged to deliver the results that communities demand as quickly as they would like. Interim design strategies are a set of tools and tactics that cities can use to improve their roadways and public spaces in the near-term. They include low-cost, interim materials, new public amenities, and creative partnerships with local stakeholders, which together enable faster project delivery, and more flexible and responsive design.

GRAND AVENUE: Van Buren Street to Roosevelt Street

Existing Conditions:

5-Lane Arterial- Commercial/Industrial

60-ft wide

Approximately 12,000 ADT

GREENING OF LOWER GRAND
