

# **MARICOPA ASSOCIATION OF GOVERNMENTS**

## **INFORMATION SUMMARY... for your review**

**DATE:**

April 19, 2011

**SUBJECT:**

Section 5310 Elderly Individuals and Individuals with Disabilities Transportation Program Priority Listing of Applicants

**SUMMARY:**

The Federal Transit Administration (FTA) provides Section 5310, Elderly Individuals and Individuals with Disabilities Transportation Program funding, to the Arizona Department of Transportation (ADOT). These capital assistance awards support agencies and public bodies that provide transportation services for older adults and for people who have a disability. The Councils of Governments, including MAG, prepare priority listings of applications for ADOT to be used when determining awards.

In March 2011, the MAG FTA Elderly and Persons with Disabilities Transportation Program Ad Hoc Committee met to interview all applicants and develop a priority listing. This year, 20 agencies submitted requests for 50 vans, three mobility management projects, and related software and hardware.

Approximately \$3.9 million is available statewide for funding this year's projects. This funding comprises traditional FTA 5310 formula funds and federal Surface Transportation Program (STP) Flexible Funds. The latter is from additional funding targeted by the State Transportation Board to augment rural-area programs. Applicants within small and large urban planning regions are eligible for STP funding if they can substantiate predominately rural routes or service areas within these regions.

**PUBLIC INPUT:**

Public comment was solicited through a public notice in January 2011 and another notice in March 2011. No public comment has been received. Opportunities for input were also offered at MAG committee meetings in March 2011 and April 2011. No input was given.

**PROS & CONS:**

**PROS:** MAG advises ADOT for the FTA Elderly Individuals and Persons with Disabilities Transportation Program awards. Forwarding this priority listing assists ADOT in awarding capital transportation equipment for special needs in the MAG region. Awards are made on a statewide competitive basis. Arizona chooses to include urban and rural area needs in this program.

**CONS:** The MAG region does not receive FTA Elderly Individuals and Individuals with Disabilities Transportation Program capital awards in relation to its population. Applicants continue to project growth in the number of people who will require special transportation including additional numbers due to a decrease in public transit services.

**TECHNICAL & POLICY IMPLICATIONS:**

**TECHNICAL:** ADOT procures accessible and non-accessible passenger vans, ancillary equipment and mobility management projects with these funds. The FTA provides 90 percent of the award cost, and the applicant provides a 10 percent match plus 1.5 percent to cover costs related to state program administration. All awards meet requirements and inspection standards of federal laws and regulations including the Americans with Disabilities Act (ADA). ADOT takes care of the technical specifications, procures the equipment, and satisfies all inspection requirements before delivery. ADOT holds liens on

vehicles for four years or 100,000 miles, whichever comes first. ADOT will receive quarterly progress reports for the mobility management projects.

**POLICY:** The Arizona Department of Transportation receives Elderly Individuals and Individuals with Disabilities Transportation Program funds on a formula basis from the U.S. Department of Transportation, Federal Transit Administration.

**ACTION NEEDED:**

Approval to forward the priority listing of applicants for the FTA Elderly Individuals and Individuals with Disabilities Transportation Program to the Arizona Department of Transportation.

**PRIOR COMMITTEE ACTIONS:**

On April 13, 2011, the MAG Management Committee recommended the priority listing of applicants for the FTA Elderly Individuals and Individuals with Disabilities Transportation Program to be forwarded to Arizona Department of Transportation.
