Graham Ware

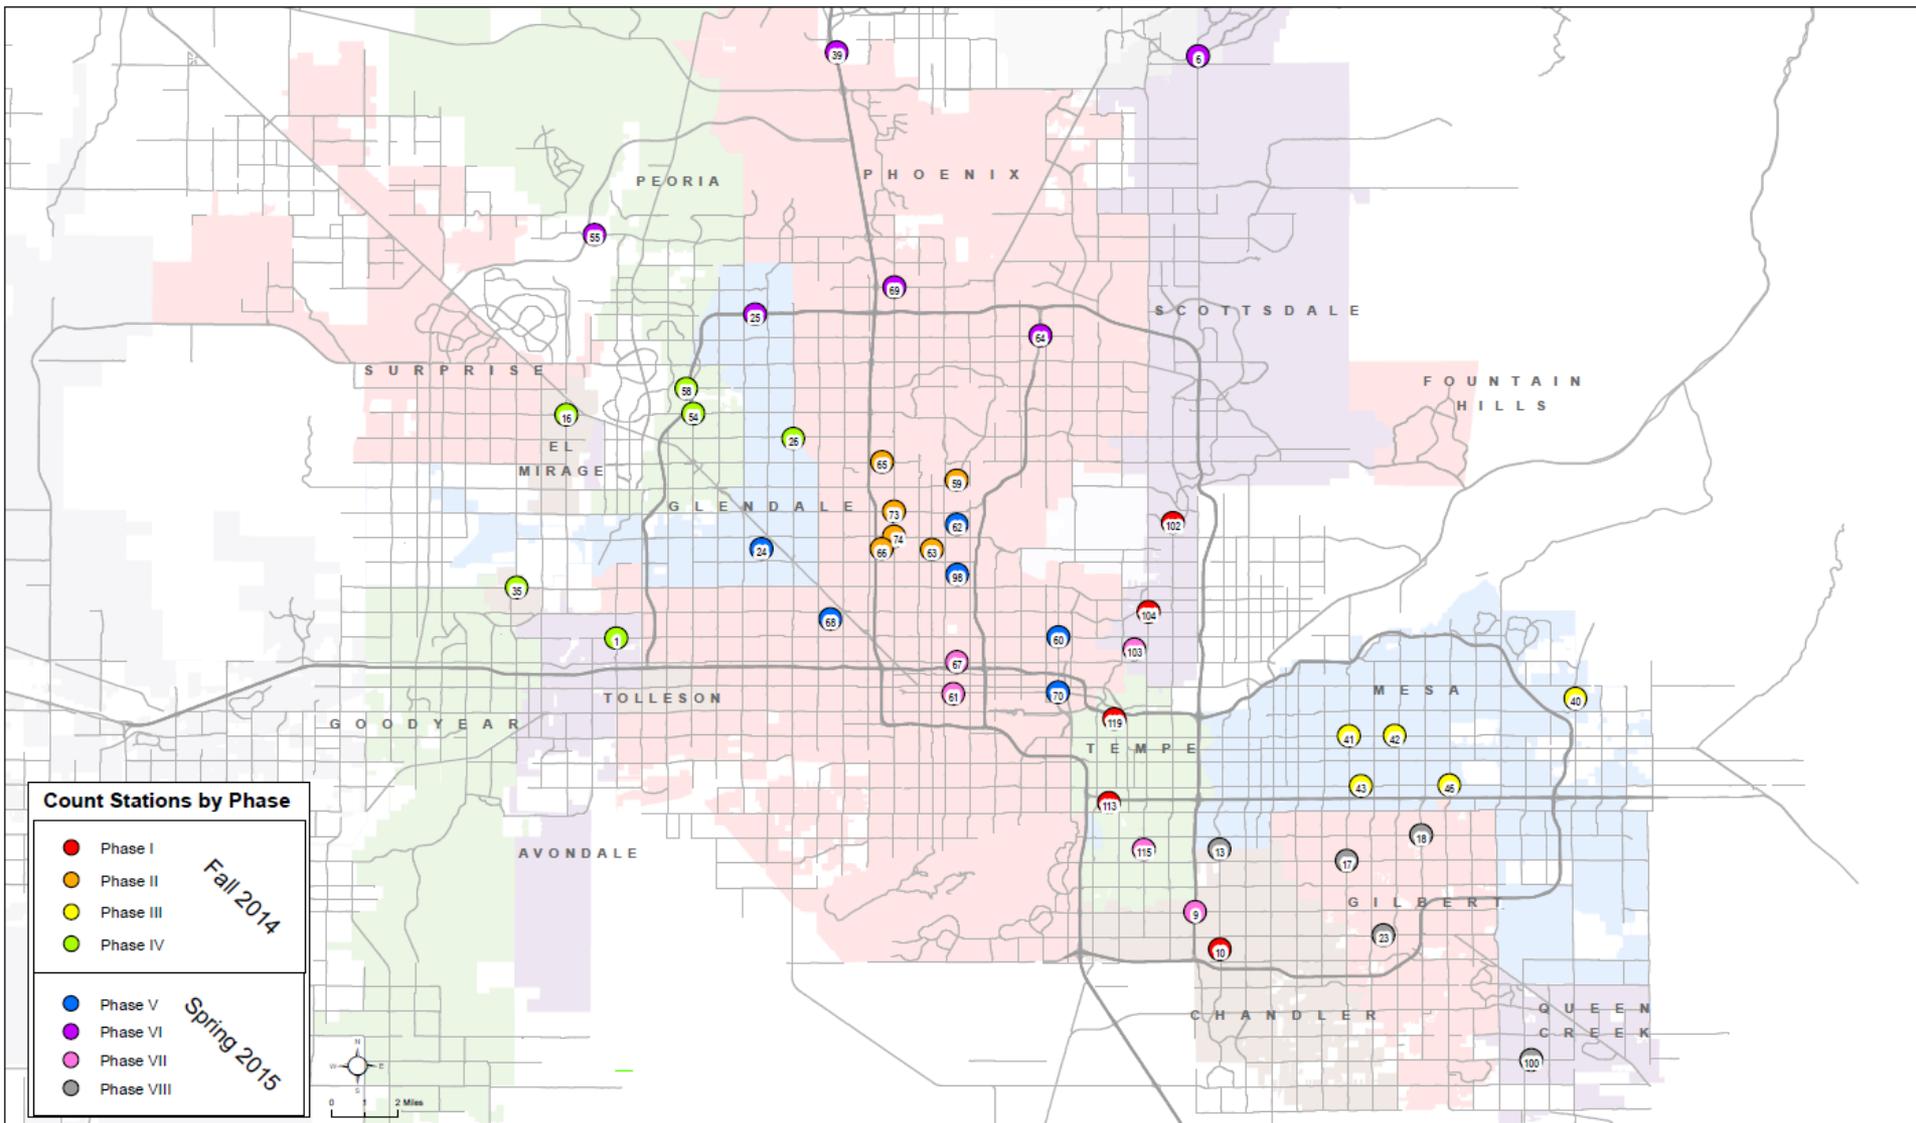

MAG Bike Counts

- Annual data collection at 44 locations
- 2 weeks of continuous, 24 hour counts
 - October-November
 - April-May
- Pneumatic tubes laid in street, bike lane, bike path
- Agencies can borrow counters when not in use by MAG

MAG Bike Counts 2014-2015

Why Collect Data?

- Before and after data on project construction
- Baseline counts
- Bike-to-transit data
- Data for project applications
- Data for studies and master planning

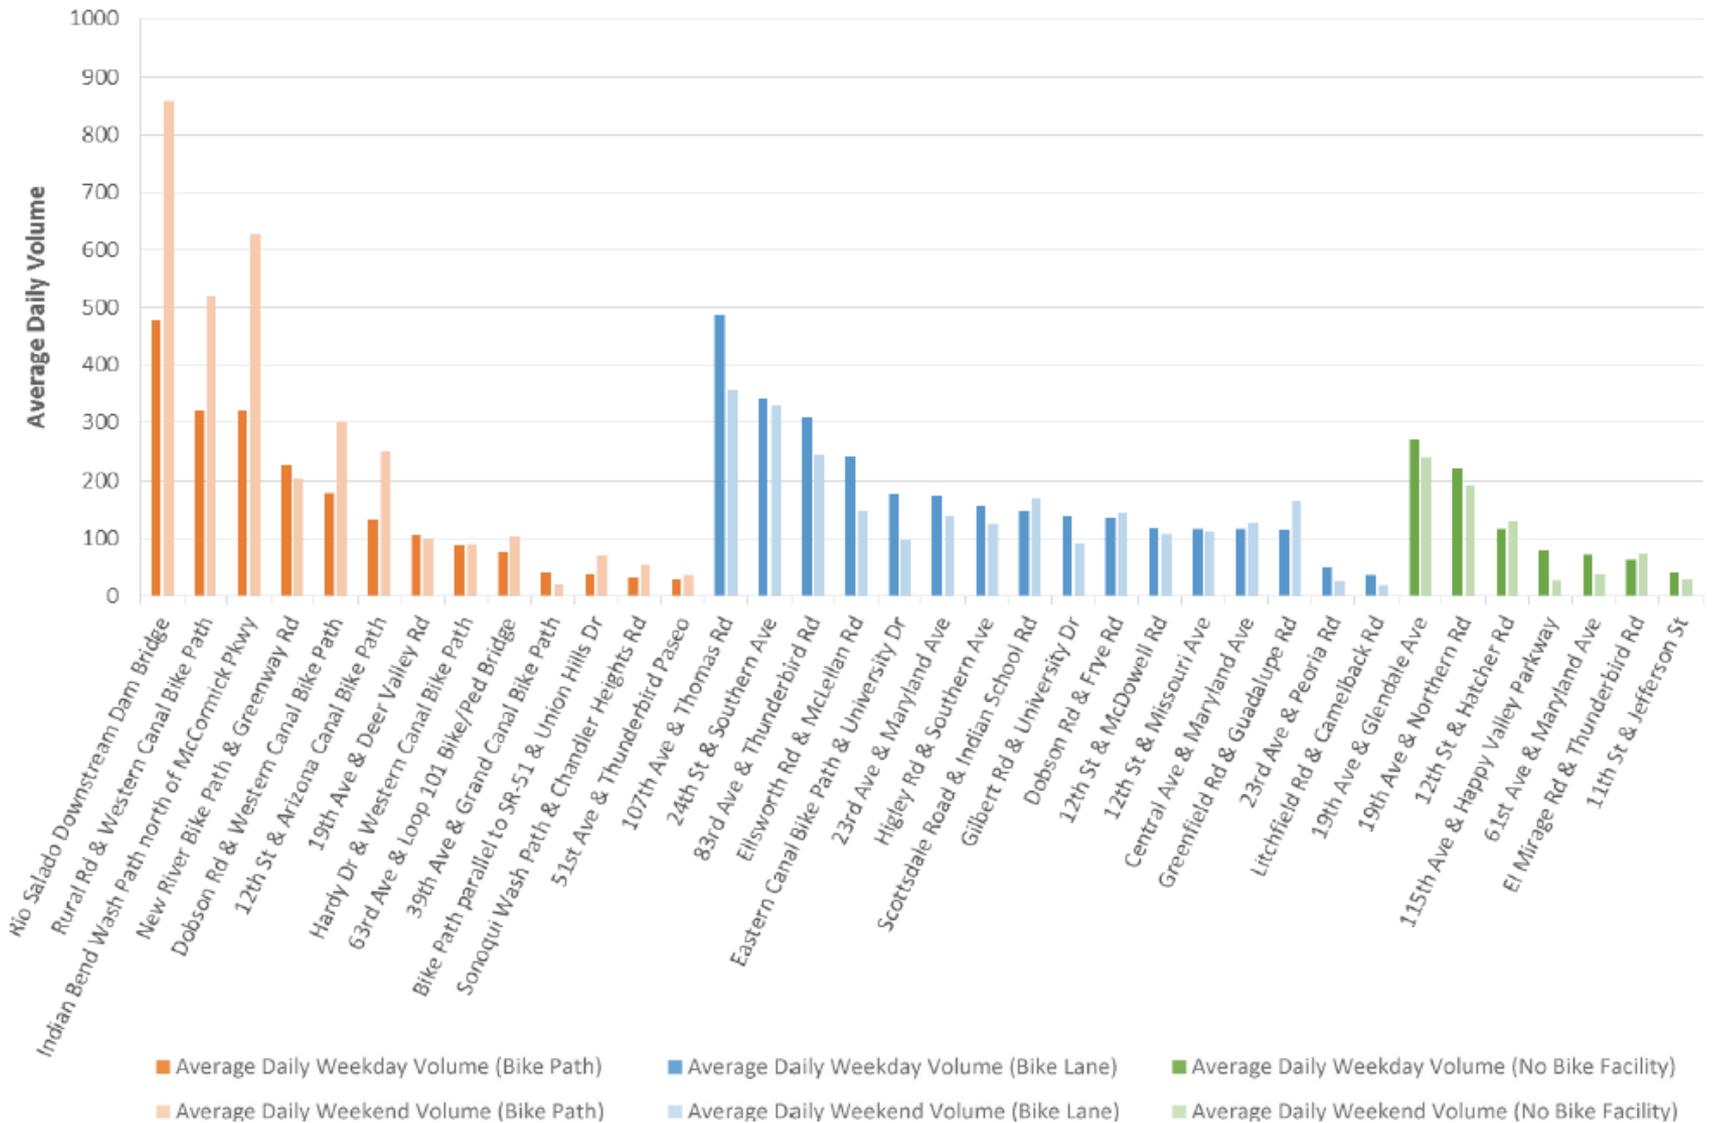

Counter Rental Program Basics

- Read guidebook
- Fill out request form/agreement
 - Return to MAG
- MAG approves requests
- Pick up and return equipment at MAG office
- Agencies responsible for installations and field checks
 - Eco-Counter Installation Guide will be provided
 - MAG staff available by phone/email to assist
- MAG will review and clean data

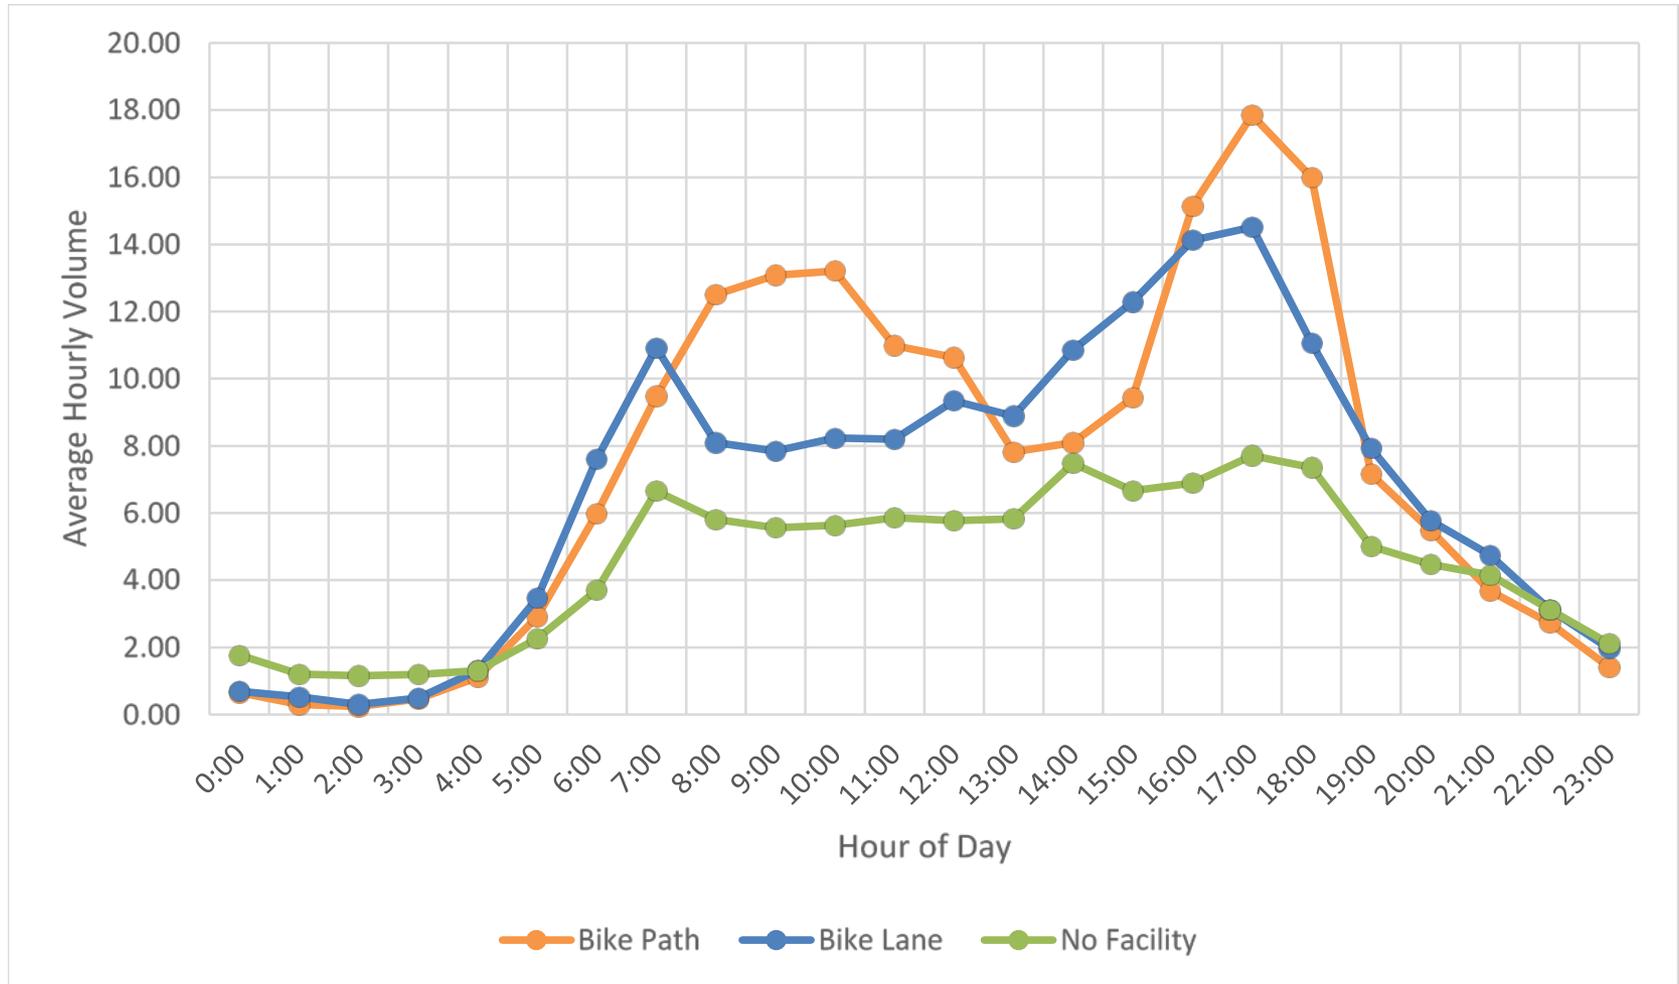

What can you get out of the data?

- Excel spreadsheet with all data
- Average daily and hourly bicycle volumes
 - Weekday and Weekend
- Day-of week volumes
- Estimated number of sidewalk riders

Average Daily Bicycle Volumes

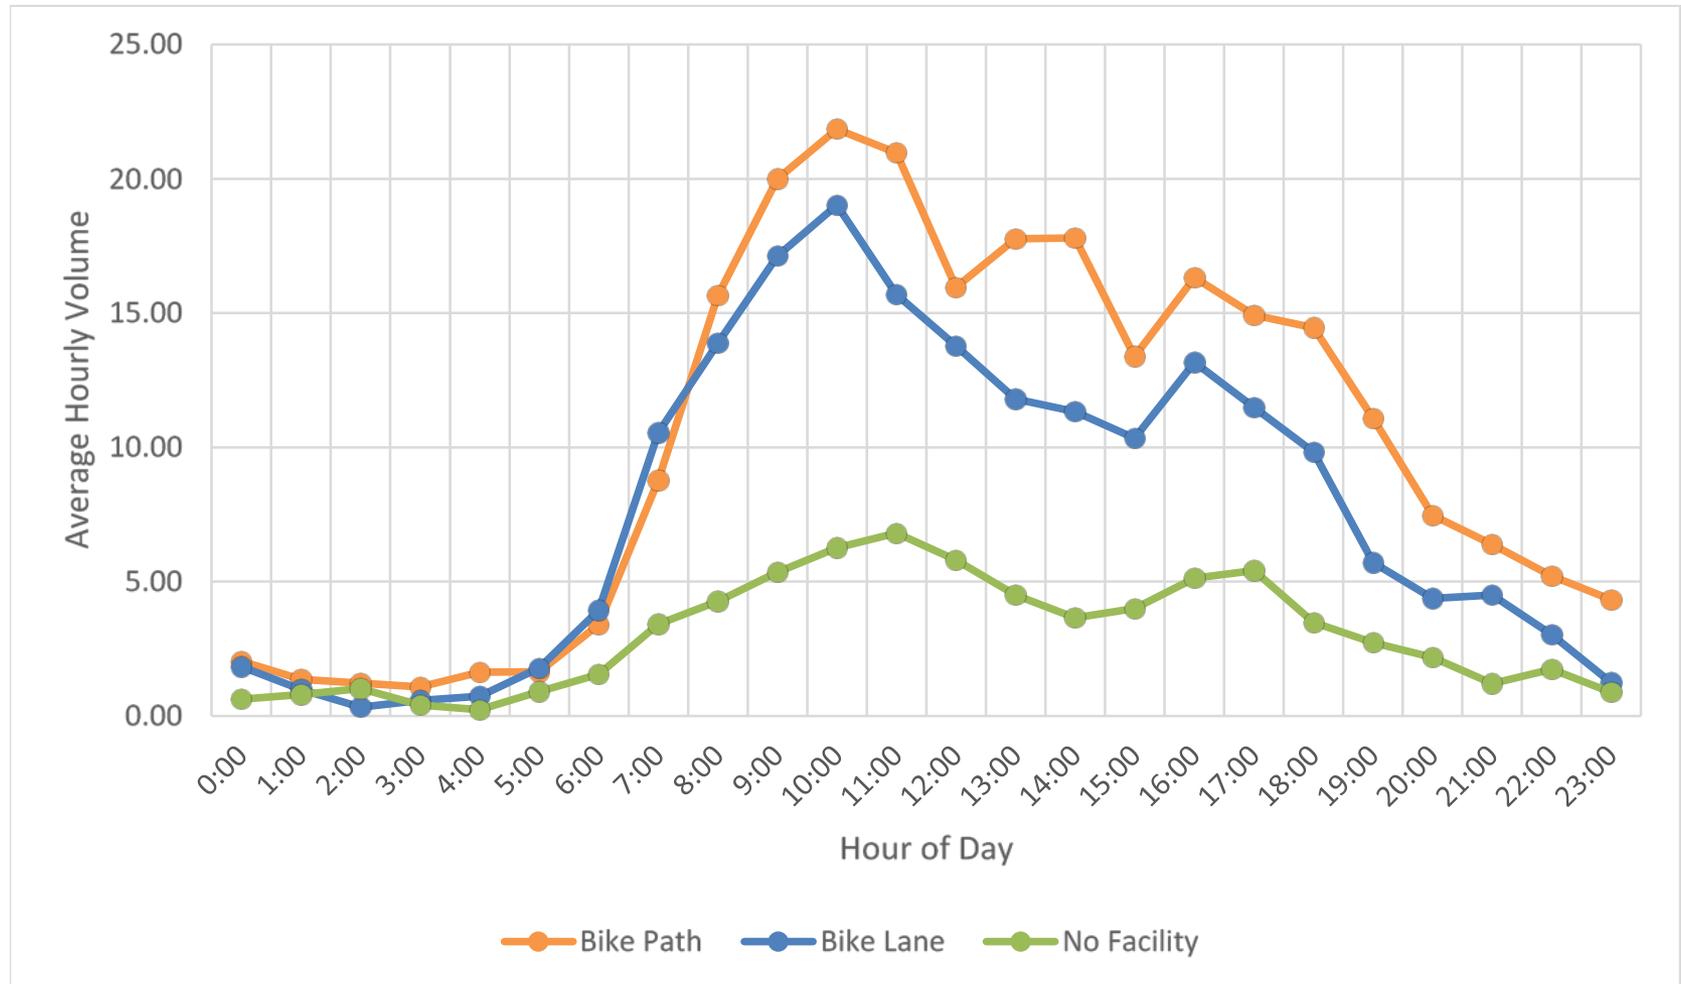

Average Hourly Weekday Volumes

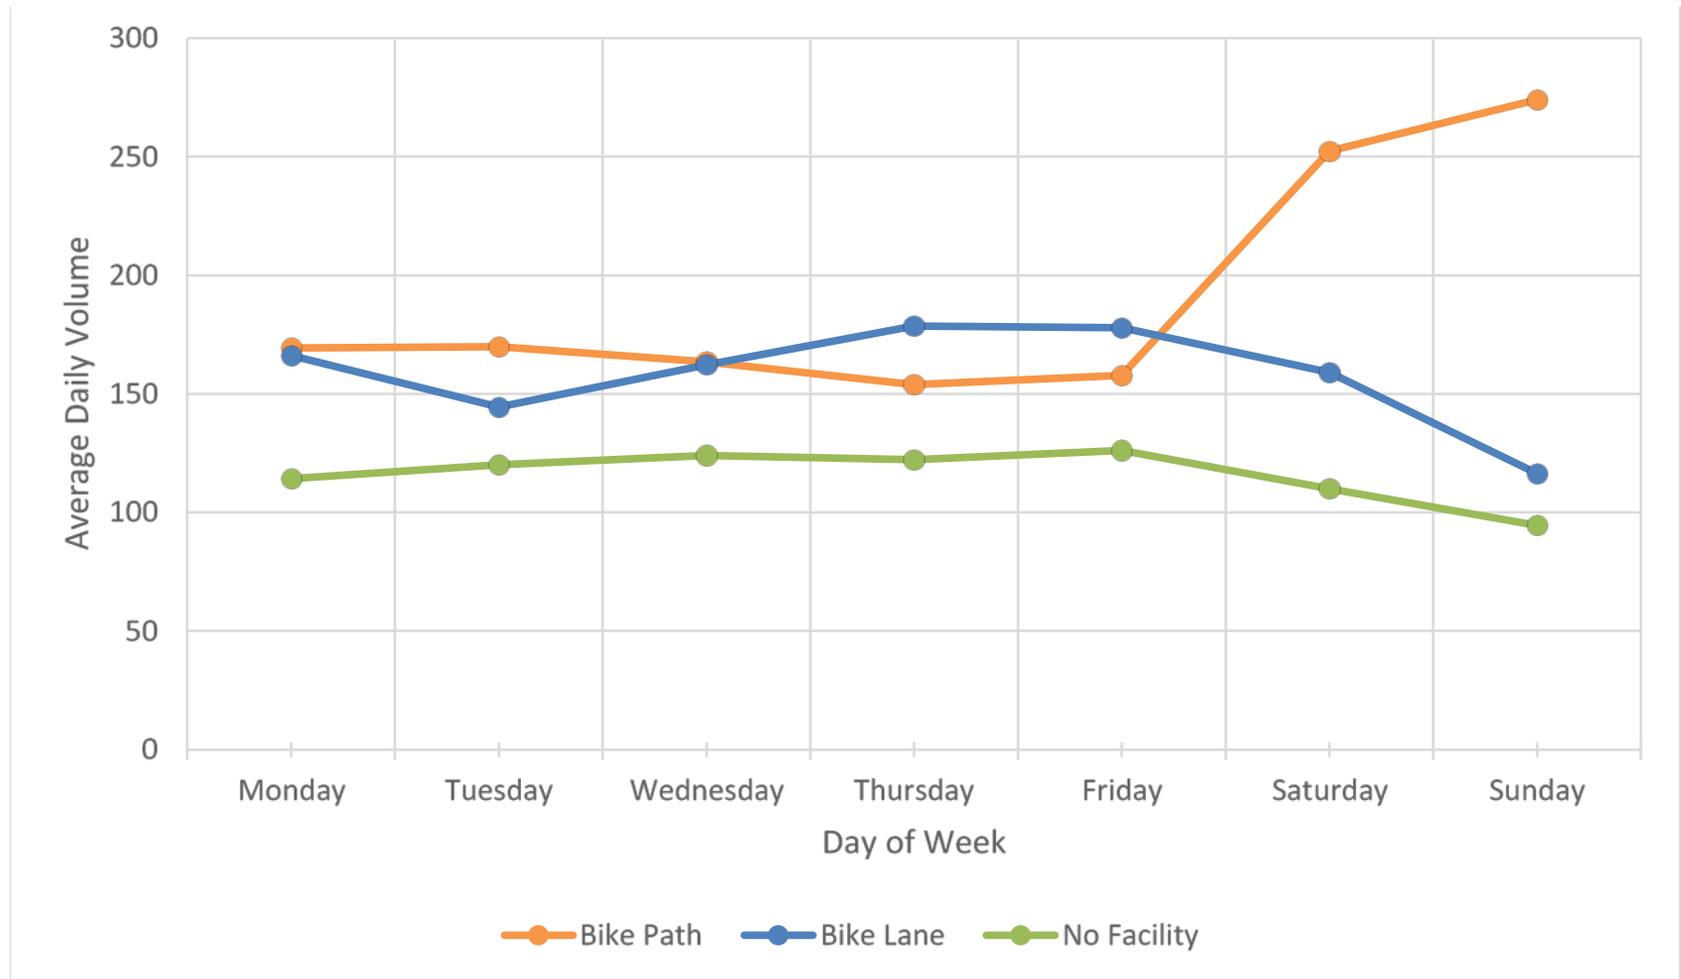

MAG Region, average of 37 automated count stations, October-November 2013

Average Hourly Weekend Volumes

MAG Region, average of 37 automated count stations, October-November 2013

Average Daily Bicycle Volumes

Additional Data Collection Options

- Collect manual peak hour (4pm-6pm) counts
- Install permanent automated counters
 - With new projects or on existing corridors
- Purchase your own temporary counters
- Cameras/Video Recordings

Next Steps

- Finalize guidebook and form
- Begin loan program in June 2015
- Hold workshop/webinar to educate on use of counter and data collection
 - Following Committee Meeting May 26?
