EXECUTIVE SUMMARY

On any given night people experience homelessness throughout the MAG region. This is according to the annual Point-In-Time (PIT) Count. On February 24, 2015, more than 300 volunteers counted and surveyed 5,631 homeless men and women staying in shelters and sleeping on the street. The purpose of the PIT Count was to collect data providing a one-night snapshot of the number of people experiencing homelessness in the region. The PIT Count, coordinated by MAG, municipalities, and regional street count coordinators, is part of a national effort to identify the number of individuals and families experiencing homelessness. The count is a component of the application to the U.S. Department of Housing and Urban Development (HUD) for homeless assistance funding for 60 programs providing transitional housing, permanent supportive housing and services in the region.

Commented [KT1]: I would not use PIT acronym. I think it comes across as negative. Why not say "Point-in-Time Count (Count or Street Count) or PITC"

The data are approximate numbers. Moreover, despite fluctuations within the subpopulations, the total homeless population for the MAG region decreased by 11 percent since the 2014 count. The table below demonstrates samples of the data collected.

2015 Count Results						
	Sheltered			Unsheltered	Total	Percentage Change from 2014
	Emergency Shelter ¹	Transitional Housing ²	Safe Haven ³	Street		
Total Number of Persons	2,004	2,313	25	1,289	5,631	-11%
Subpopulations						
Homeless Youth (under 18 yrs.)	49	5	0	0	54	-97%
Chronically Homeless	171		14	258	443	+10%
Chronically Homeless Veterans	11		1	38	50	-64%
Homeless Veterans	89	229	1	100	419	+35%

Street count coordinators made some adjustments to the methodology for the 2015 PIT Count. The high-profile Super Bowl XLIX activities resulted in delaying the date of the count from the last week in January (mandated by HUD) to the last week in February to ensure that Super Bowl activities would not interfere with conducting the count. Furthermore, MAG partnered with the Homeless Management Information System (HMIS)⁴ to collect and analyze the PIT Count data from shelter programs. In previous years, MAG staff was responsible for tabulating and analyzing the data by hand. Details on the changes in methodology, limitations, and data analysis are discussed in the full report.

Special Thank You

The parties listed below played a very important role in the planning process of the 2015 PIT Count.

Municipality: Coordinator

- City of Avondale: *Donna Gardner*
- City of Buckeye: *Debbie Driscoll*
- Town of Carefree: *Stacey Bridge-Denzak*
- Town of Cave Creek: *Adam N. Stein*
- City of Chandler: *Jeanne Bosarge & Leah Powell*
- City of El Mirage: *Robert Peoples*
- Town of Gilbert: *Bill Campbell*
- City of Glendale: *Gilbert Lopez & Erik Strunk*
- City of Goodyear: *Eric Webster*
- Town of Guadalupe: *Tina Ochoa*

Youth Count Coordinators

- David Garrett, *OneNTen*
- Kenneth McKinley, *Tumbleweed*
- Victor Rojas, *Tumbleweed*

Homeless Street Count Training Video

- Jonathon Pearson, *Human Services Campus*
- Matt Sager, *Human Services Campus*
- Laura DiTroia, *Lodestar Day Resource Center*
- Celina Brun, *Maricopa Association of Governments*
- Brande Mead, *Maricopa Association of Governments*
- Jason Stephens, *Maricopa Association of Governments*
- Garry Stafford, *Midnight Sunfilms*
- Ken Curry, *Southwest Behavioral Health Services*

Municipality: Coordinator

- City of Litchfield Park: *Sonny Culbreth*
- City of Mesa: *Tammy Albright, Constance Bachman & Deanna Grogan*
- City of Peoria: *Jack Stroud*
- City Phoenix: *Kristina Blea*
- Town of Queen Creek: *Joe La Fortune*
- City of Scottsdale: *Eugenio Munoz-Villafane*
- City of Surprise: *John Bacon*
- City of Tempe: *Theresa James*
- City of Tolleson: *Janey Montoya*

Family Count Coordinators

- Frank Migali, *Arizona Department of Education*
- Billy Cawley, *Central Arizona Shelter Services*
- Laura Skotnicki, *Save the Family*
- Kathy Dinolfi, *Turn a New Leaf*
- Mark Dobay, *Turn a New Leaf*
- Chela Sullivan, *UMOM*

Data Analysis Team

- Maricopa Homeless Management Information System Project, *Community Information and Referral*
- Michelle Thomas
- Tricia Cano
- Richard Marten
- Mykhaylo Kufryk
- Shantae Smith
- Cindy Flores
- Melissa Montano

INTRODUCTION

Homelessness occurs when individuals or households are unable to acquire or maintain affordable housing. In January 2014, “there were 578,424 people experiencing homelessness on any given night in the United States”⁵. This number comes from the PIT Count. The PIT Count is a HUD requirement and conducted on a single night in January every other year. During the count, communities must identify the sheltered and unsheltered *Families, Youth, Veterans, Chronically Homeless, and Individuals* experiencing homelessness in their community. Following the PIT Count, communities are required to submit their collected data through their Continuum of Care to qualify for the ⁶McKinney-Vento Homeless Assistance Grants program. The PIT Count is important in establishing the dimensions of homelessness in a particular community and assists program administrators and policy makers in tracking the progress toward ending homelessness. Furthermore the PIT Count is an effort to learn more about the individuals and families experiencing homelessness in Maricopa County in an effort to accomplish local and federal goals toward ending homelessness.

Maricopa County plans the PIT Count every year to take a statistical snapshot of homelessness in the region. Every year the Maricopa Association of Governments (MAG) Continuum of Care⁷, City of Phoenix, and participating municipalities facilitate the planning process of conducting the regional PIT Count.

For the PIT Count in the region, hundreds of volunteers work in groups to count and identify unsheltered persons experiencing homelessness. Simultaneously, shelters in the

region connected to the local Homeless Management Information System (HMIS)⁸ are required to submit data on persons staying in their shelters. For shelters in the region not connected to the local HMIS, MAG distributed a (non-HMIS) Shelter Count form⁹ to be filled out and returned. The Sheltered PIT Count collects data from *emergency shelters, transitional housing, and Safe Haven* programs. Likewise, during the night of the count, homeless service providers must submit a Housing Inventory Count (HIC) that takes an inventory of bed and unit capacity of provider programs that offer beds and units dedicated to serving persons who are homeless and categorized by the same programs. The HIC and Sheltered PIT Count were designed to occur simultaneously to determine gaps in housing need.

Based on local data collected during the 2014 Count, 5,918 people had experienced homelessness in Maricopa County, with 1,053 of them reported to be sleeping on the streets and 4,865 people in shelters. Of the total number of people counted, 1,819 were youth.

With the completion of the 2015 PIT Count, this report will summarize the background, research methodology, limitations, and results of the 2015 Homeless PIT Street and Shelter Count. The purpose of this report is to share the results of the count with the community, to provide a discussion of the methodology used, and to offer an analysis of the findings.

⁷ See Appendix E (page 22) for Continuum of Care definition

⁸ Department of Housing and Urban Development Information Exchange, <https://www.hudexchange.info/hmis/> “A Homeless Management Information System (HMIS) is a local information technology system used to collect client-level data and data on the provision of housing and services to homeless individuals and families and persons at risk of homelessness. Each Continuum of Care is responsible for selecting an HMIS software solution that complies with HUD’s data collection, management, and reporting standards.”

⁹ See Appendix F-C (page 23)

2015 MAG Continuum of Care Point-In-Time Count for Maricopa County

Data from the street and shelter count are collected to measure homelessness on a national and local scale and then published on the HUD Homeless Data Exchange (HDX) website. As part of the Annual Homeless Assessment Report, the data are provided to Congress annually. The Annual Homeless Assessment Report is used by HUD, Congress, additional federal departments, and the general public to understand the nature and extent of homelessness. The annual report also is an important measure of local and national progress toward ending homelessness.

The PIT Count data also play a critical role in the annual Continuum of Care Program Competition¹⁰. HUD requires Continuums of Care to submit data and methodology reports and uses the information to evaluate the progress Continuums of Care are making to reduce homelessness. Reductions in homelessness are scoring factors that can influence Continuum of Care program funding awards.

METHODOLOGY

Each Continuum of Care conducts a PIT Count utilizing HUD recommended practices and a variety of methodologies based on local demographic and geographic characteristics. Unique to the geographic area of the count in Maricopa County is the size of the county. With 9,223 square miles¹¹ to cover for the PIT Count, and 27 municipalities involved in the planning process, a combination of non-random sampling, extrapolation, and sample methods (based on common areas where homeless individuals congregate) were used.

The MAG Continuum of Care includes three surveys¹² in the count to identify geographic and demographic data: an in-person interview

with a brief survey for persons unsheltered; an observation survey for persons unsheltered but not approachable; and a survey for shelters to count clients on the night of the count.

VOLUNTEERS

For the 2015 PIT Count, MAG developed an online form for volunteers (public) to sign up and be assigned teams of two to three people. City of Phoenix service providers are required under contract to participate and volunteer outreach professionals are assigned to high density areas like downtown Phoenix. For the 2015 Count, there were more than 300 volunteers, which is the highest number the count has ever had.

MOBILE APPLICATION

HUD introduced a PIT mobile application for the 2015 PIT Count. The mobile application was designed as an alternative to paper surveys to determine data in 'real time' via a 'data center'¹³. There was no cost associated with downloading or using the mobile application, which can operate with or without a data connection. MAG coordinated with six groups, enabling one member per group to test the application. The mobile application had three surveys: a shelter survey, an interview survey, and an observation survey. The questions on the mobile application surveys did not match the questions on the paper surveys used by the MAG Continuum of Care and were not customizable. As a result, the mobile application was used as a trial to understand if the application makes the counting process and data analysis more efficient than using paper surveys. Feedback from the mobile application users proved that the application was user-friendly and efficient. Future use of the mobile application has not been determined.

¹³ Please see Appendix G (page 37, 38).

2015 MAG Continuum of Care Point-In-Time Count for Maricopa County

PREPARATION

Some improvements were made to the 2015 count. MAG developed a training video demonstrating how to identify someone experiencing homelessness and how to approach that person safely. The training video is now being used to train outreach professionals who approach persons experiencing homelessness on a daily basis. MAG also designed volunteer name tags for identification purposes to facilitate a safe interview process.

Furthermore, trainings occurred between 4:00 p.m. and 8:00 p.m. in two-hour time slots in Glendale, Mesa, Phoenix, and Scottsdale. Volunteers could choose the municipality in which they wanted for training and counting through the online volunteer form. The street count coordinator of each municipality was responsible for creating volunteer packets with surveys, a map of the volunteer's designated counting area, a name tag, and further instructions for the morning of the count. For 2015, municipal street count coordinators extended the time frame of the count in an effort to gain a more accurate count of families and youth since both subpopulations tend to be visible earlier or later in the day. The count began one hour earlier and ended two hours later. All volunteers were advised to begin counting at 6:00 a.m. and were expected to end around 10:00 a.m. Valley locations operating as welcome centers offered bags of hygiene products or food in exchange for an interview and operated until noon in an effort to reach out to families and youth experiencing homelessness.

LIMITATIONS

While the PIT Count provides valuable information about homelessness in the community, there are limitations to keep in mind. This section will identify the limitations of the 2015 Count for the MAG Continuum of Care.

GEOGRAPHY

The size of Maricopa County makes it difficult to identify all persons experiencing homelessness. Data collected and analyzed are a general representation of a one-night snapshot in the region.

YOUTH, FAMILIES, AND POPULATIONS NOT COUNTED

HUD requires communities to count a person experiencing homelessness only if they fit under the HUD definition of homelessness. HUD and the Arizona Department of Education (ADE) define a youth experiencing homelessness differently. According to the ADE, under the guidelines of the *McKinney-Vento Homeless Education Assistance Act*, a "youth experiencing homelessness" is someone who lacks "a fixed, regular, and adequate nighttime residence."¹⁴ This definition includes youth who are sharing housing due to economic hardship. According to HUD, a person is considered homeless if they are staying in a place that is not meant for human habitation.

The ADE collects data on homeless youth in the education system through school homeless youth liaisons; however, that data cannot be included in homelessness data submitted to HUD due to conflicting definitions of homelessness. Moreover, the youth subpopulation overlaps the family subpopulation, since many homeless youth in the education system are a part of a family unit that is also experiencing homelessness.

¹⁴ The McKinney-Vento Act defines "homeless children and youth" as individuals who lack a fixed, regular, and adequate nighttime residence. The term includes children and youth who are:
sharing the housing of other persons due to loss of housing, economic hardship, or a similar reason (sometimes referred to as doubled-up); living in motels, hotels, mobile homes, or camping grounds due to lack of alternative adequate accommodations; living in emergency or transitional shelters; abandoned in hospitals; or awaiting foster care placement.

2015 MAG Continuum of Care Point-In-Time Count for Maricopa County

Identifying families experiencing homelessness is difficult for three reasons: many times families have a place for their children to stay during the week while kids are in school but are homeless on the weekends; homeless families are more visible during weekends; families living on the streets or in their vehicles frequently try to hide their homelessness out of fear that parents will lose custody of their children. During the street count for safety reasons, volunteers are told to avoid searching for homeless individuals in automobiles or abandoned buildings, which are common areas for homeless families to seek refuge.

Unaccompanied youth under the age of 18 often try to stay under the radar because of concern that they will be forced to return to their parents or will be sent to foster care¹⁵.

In an effort to identify the homeless youth subpopulation that is not associated with a family or ADE liaison, MAG coordinated with homeless youth providers like Tumbleweed, HomeBase, and OneNTen to plan magnet events where the youth could come for food, services, and entertainment in exchange for participating in the count. Youth providers used social media and outreach to build awareness of the magnet event¹⁶. This method was used for the first time in Maricopa County and will now be used in future counts.

Individuals staying at a jail or hospital during the count, who are otherwise homeless, are not counted since they are not considered homeless by the HUD definition during the time of the count. Furthermore, due to confidentiality rules, hospitals cannot disclose the housing status of patients staying in Emergency Rooms (ER). As a result, homeless

individuals in the ER are not included in the Count data.

PIT DATA

There are more people who experience homelessness over the course of the year than on a single night. PIT Counts tend to under-represent short-term homelessness and over-represent individuals who have experienced homelessness for a long time.

PARTICIPATION

Volunteers experienced more homeless persons refusing to participate in the survey count than in previous years. Respondents may choose to not participate for a variety of reasons. Some individuals may want to preserve their privacy, or do not consider themselves homeless. Some individuals may be clearly homeless on the date of the count, but were unable to provide information due to mental illness or impairment. The Observation Survey is designed for situations where outreach workers or volunteers are unable to complete a survey. This form of data collection is subjective.

DATE

Based on HUD requirements, communities must conduct their count within the last week of January. However, there are exceptions. If a major event occurs during this time that has the potential to adversely affect the data, the community may apply to HUD seeking approval to move the date of the count to the last week in February. For the 2015 count, it was brought to the attention of the PIT Count planning group that *Super Bowl XLIX* activities, which took place throughout several cities in the region including Glendale, Phoenix, and Scottsdale, may impact the results of the count. Although the game would not occur on the actual day of the count, the anticipated activities were expected to draw in considerable traffic, resulting in street closures in downtown Phoenix and Glendale. The MAG Continuum of Care sent a request to HUD to move the date of the count to the last

¹⁵ 2013 Point-In-Time Count of Homelessness in Portland/Multnomah County, Oregon. Kristina Smock Consulting. June 2013.

¹⁶ 2014 HUD Unsheltered POINT-IN-TIME Count Standards, William Snow, Community Planning and Development, *slide 13*

2015 MAG Continuum of Care Point-In-Time Count for Maricopa County

week in February. The request was approved and the annual PIT Count took place on the morning of February 24, 2015.

RECLASSIFICATION OF DATA

In 2014, homeless data from the Men's Overflow Emergency Shelter and adjacent East Lot were categorized as *sheltered* data, however, for the 2015 count, homeless data from the East Lot were categorized as *unsheltered*¹⁷. This change resulted in 251 individuals categorized as unsheltered instead of sheltered. The change in how these individuals were categorized was recommended by the street count planning group because the group felt that it would be more accurate to count people sleeping in a parking lot as unsheltered. This translates to a superficial rise in the unsheltered homeless population.

HOMELESS MANAGEMENT INFORMATION SYSTEM (HMIS)

Historically, the Maricopa HMIS Project has pulled PIT Count data for the HMIS participating sheltered count and MAG staff has analyzed PIT Count data by hand. As part of the greater Phoenix region's growing efforts in planning the annual PIT Count, MAG coordinated with HMIS for PIT Count data analysis. The transition to use HMIS to analyze the data and not duplicate data may present more accurate results than previous years. Furthermore, the data from HMIS provided more accurate answers to survey questions such as documenting

chronically homeless and veteran status. Having this data available in HMIS will help for future research on how the homeless migrate back and forth from shelter to the streets.

¹⁷ Funder Collaborative to End Homelessness in Maricopa County, May 2015.

"Structural facility issues, which were cost prohibitive to repair, necessitated the closure of the MOS facility. The facility was closed on March 31, 2015, following completion of a six-month phase-out plan, which gradually reduced service capacity. The parking lot adjacent to the facility will remain open until May 15, 2015, at which point indoor, low demand shelter services will be available for 260 individuals across the street from the current site at the Human Services Campus. A supervised outdoor area will also be available for additional individuals."

DATA ANALYSIS

The PIT Count is a critical source of data intended to geographically and demographically represent a general snapshot of persons who are experiencing homelessness in a region. The shelter count captures a snapshot of individuals and families in shelters at the time of the count. The street count captures a snapshot of individuals and families who were staying in locations not meant for human habitation at the time of the count. The following section will discuss data elements of the count in greater detail.

Figure 1: Maricopa County Total Homeless Population from 2013-2015*.

*Percentage is calculated based on total number of homeless population

Figure 1 demonstrates the three-year trend in the region’s total homeless population, total unsheltered population, and total sheltered population from 2013 to 2015. The sheltered population includes emergency shelters (ES)¹⁸, domestic violence (DV) shelters, and transitional housing (TH)¹⁹. While the overall homeless number has remained relatively stable, the 2015 numbers show a slight five percent decrease from 2014 and a slight four percent decrease from 2013.

¹⁸ Please see Appendix E: Glossary (page 21)
¹⁹ Please see Appendix E: Glossary (page 21)

2015 MAG Continuum of Care Point-In-Time Count for Maricopa County

Figure 2: 2015 Unsheltered Populations by Municipality

Municipality	2015	2014	2013
Apache Junction	0	0	0
Avondale	20	12	5
Buckeye	0	0	0
Carefree	0	0	0
Cave Creek	1	0	0
Chandler	31	18	20
El Mirage	0	0	7
Fountain Hills	0	0	0
Gila Bend	0	0	0
Gilbert	1	0	0
Glendale	25	39	16
Goodyear	1	2	4
Guadalupe	0	5	12
Litchfield Park	0	0	0
Mesa	155	55	42
Paradise Valley	0	0	0
Peoria	30	13	0
Phoenix	994	771	1339
Queen Creek	0	0	0
Scottsdale	0	39	11
Surprise	7	0	0
Tempe	24	97	125
Tolleson	0	2	0
Wickenburg	0	0	0
Youngtown	0	0	0
Total	1,289	1,053	1,581

For a municipal breakdown of the unsheltered total from 2013 to 2015, Figure 2 above identifies the total unsheltered count for each municipality that participated in the street count.

Figure 3: 2015 Sheltered and Unsheltered Homeless Populations by Gender*

Figure 3 depicts the gender of all persons²⁰ identified as homeless on February 24, 2015. For the 2015 Count, HUD was seeking data on individuals that identified as Transgender. During the count, eight persons identified as Transgender and five of the eight persons were unsheltered.

Figure 4: 2015 Sheltered and Unsheltered Populations by Race*

Figure 4 shows the ethnicities of the sheltered and unsheltered homeless populations for 2015. According to Figure 4, 46 percent of the homeless population was identified as sheltered and Caucasian, which is the largest racial group. Individuals who identified as Black or African American in shelter accounted for 22 percent of the total homeless population.

²⁰ Please see Appendix I: HMIS HDX Data Reports (page 43)

Figure 5: 2015 Homeless Population by Hispanic or Latino Origin*

Figure 5 shows the sheltered and unsheltered populations by Hispanic or Non-Hispanic origin. Based on Figure 5, four percent of the total homeless population identified as unsheltered and Hispanic and 19 percent of the total homeless population identified as sheltered and Hispanic. In comparison to 77 percent of the total homeless population that identified as Non-Hispanic, the Hispanic homeless population is small, which could be a positive factor in outreach efforts, since there might be a language barrier.

Figure 6: Subpopulations of Homeless*

Figure 6 shows the percentage and number by housing status for the various subpopulations for which HUD requires data collection. According to Figure 6, victims of domestic violence account for 10 percent of the total homeless population, and nine percent of the domestic violence subpopulation was identified as sheltered on the date of the count. In comparison, the subpopulations for individuals with Substance Abuse Disorder, Serious Mental Illness, Chronic Homelessness, or Veteran Chronic Homelessness, have a higher percentage identified as unsheltered on the date of the Count.

2015 MAG Continuum of Care Point-In-Time Count for Maricopa County

Figure 7: 2015 Sheltered and Unsheltered Chronically Homeless Families and Singles*

Figure 7 expresses the unsheltered and sheltered status of chronically homeless families and individuals from 2013 to 2015. Based on count data, since 2013, efforts to house chronically homeless families has improved from four chronically homeless unsheltered families in 2013 to zero chronically homeless families in 2015.

Figure 8: 2015 Sheltered and Unsheltered Veterans*

Figure 8 depicts the subpopulations of veteran families and veteran singles who identified as unsheltered or one of the three main shelter categories. According to Figure 8, veteran families that identified in the Count were housed in Transitional Housing or Emergency Shelter.

Figure 9: 2015 Homeless Veteran Population by Gender

Figure 9, shows the homeless Veteran population by gender. According to Figure 9, 95 percent of the homeless Veteran population identified as male and five percent identified as female.

Figure 10: 2015 Ethnicity of Homeless Veterans Population.

Figure 10 shows the ethnicities of the veteran population for 2015. Based on Figure 10, 68 percent of veterans identified as Caucasian and 26 percent of veterans identified as Black or African American. The remaining veteran population identified as six percent American Indian, with one person identifying as Asian.

2015 MAG Continuum of Care Point-In-Time Count for Maricopa County

Figure 11: 2015 Homeless Youth Population under 18 years of age by shelter

Based on Figure 11, the homeless youth population was identified in either emergency shelters or transitional housing. Most of the youth population experiencing homelessness, 91 percent, was in emergency shelter and the remaining five percent were in transitional housing. According to the data collected, there were no youth under 18 years identified as homeless on the street. Data²¹ on the overall count of youth experiencing homelessness²² in the valley is depicted in figure 12. The sheltered data in figure 12 represents homeless youth 25 years of age or younger; however, the unsheltered data only represent youth between 18 and 24 years of age.

Figure 12: 2015 Unaccompanied Homeless Youth Population

²¹ Please see appendix H-e (page 52)

²² Notice for Housing Inventory Count (HIC) and Point-in-Time (PIT) Data Collection for Continuum of Care (CoC) Program and the Emergency Solutions Grants (ESG) Program

U.S. Department of Housing and Urban Development Community Planning and Development
CPD-14-014, issued October 2, 2014, (page 18)

“Beginning in 2015, CoCs must report data on persons in Youth Households, including the gender, race, and ethnicity for parenting youth and unaccompanied youth. Parenting youth are youth who identify as the parent or legal guardian of one or more children who are present with or sleeping in the same place as that youth parent, where there is no person over age 24 in the household. Unaccompanied youth are persons under age 25 who are not presenting or sleeping in the same place as their parent or legal guardian, including: A. single youth; B. youth couples; and C. groups of youth presenting as a household.”

CONCLUSION

The 2015 PIT Count had a strong volunteer participation, thanks to the planning efforts of the MAG Continuum of Care and participating municipalities. Through collaboration with HMIS, the data were collected and analyzed to communicate a general snapshot of homelessness in the region. In comparison to data from 2014, the shelter count decreased by 11 percent and the street count increased by 22 percent. Local experts attribute this shift to the re-categorized data of the East Lot. Overall, the number of persons experiencing homelessness has decreased in the last three years. Moreover, decreases in data were identified for various subpopulation subcategories for 2015 data. The data presented in this report represent one night in the region and cannot fully determine and identify the various populations in the region experiencing homelessness. The materials in the appendix are meant to support data and other planning efforts of the 2015 PIT Count. It is important to consider the results of the 2015 count within the context of local efforts to move the chronically homeless and veteran populations out of homelessness through the provision of housing and support services. Furthermore, the community has worked diligently to ensure that homeless individuals originally seeking shelter at the Men's Overflow Shelter and East lot are quickly rehoused through a partnership of the St. Vincent De Paul Society and the Lodestar Day Resource Center.

This report was developed using data to recognize that homelessness is a complex, recurring issue in the region. Planning efforts for the annual PIT Count have increased each year as more resources are made available, and recruitment efforts for volunteers continue to improve. In addition, the partnership among municipalities, the MAG Continuum of Care, and PIT Count Coordinators is growing stronger in an effort to unify planning efforts. With the coordination, planning efforts, and initiative of the MAG Continuum of Care and supporting agencies, the region will continue to collaborate on efficient and effective approaches to provide housing and end and prevent homelessness regionally.

Appendix E: Glossary of terms

Continuum of Care

An administrative geographical unit; the local or regional body that coordinates funding and services for homeless people.

Continuum of Care Program Competition

HUD makes funding available to homeless provider programs. The CoC Program is designed to promote a community-wide commitment to the goal of ending homelessness; to provide funding for efforts by nonprofit providers, States, and local governments to quickly re-house homeless individuals and families while minimizing the trauma and dislocation caused to homeless individuals, families, and communities by homelessness; to promote access to and effective utilization of mainstream programs by homeless individuals and families; and to optimize self-sufficiency among individuals and families experiencing homelessness.

Emergency Shelter

any facility, the primary purpose of which is to provide temporary or transitional shelter for the homeless in general or for specific populations of the homeless.

PIT Count (PIT)

Continuums of Care are required to conduct an annual count of homeless persons who are sheltered (i.e. persons in emergency shelter, transitional housing, and Safe Havens on the night of the count) and unsheltered.

Homeless

An individual who lacks a fixed, regular, and adequate nighttime residence; as well an individual who has a primary nighttime residence that is a supervised publicly or privately operated shelter designed to provide temporary living accommodations, an institution that provides a temporary residence for individuals intended to be institutionalized; or a public or private place not designed for, or ordinarily used as, a regular sleeping accommodation for human beings.

Homeless Management Information System (HMIS)

a local information technology system used to collect client-level data and data on the provision of housing and services to homeless individuals and families and persons at risk of homelessness. Each Continuum of Care is responsible for selecting an HMIS software solution that complies with HUD's data collection, management, and reporting standards.

Household

All the people who occupy a housing unit. A household includes the related family members and all the unrelated people, if any, such as lodgers, foster children, wards, or employees who share the housing unit. A person living alone in a housing unit, or a group of unrelated people sharing a housing unit such as partners or roomers, is also counted as a household.

Housing Inventory Count (HIC)

The HIC is a snapshot of a Continuum of Care's housing inventory on a single night during the last ten days in January. It should reflect the number of beds and units available on the night designated for the count that are dedicated to serve persons who are homeless. Beds and units included on the HIC are considered part of the Continuum of Care homeless system.

Transitional Housing

A project that has as its purpose facilitating the movement of homeless individuals and families to permanent housing within a reasonable amount of time (usually 24 months). Transitional housing includes housing primarily designed to serve deinstitutionalized homeless individuals and other homeless individuals with mental or physical disabilities and homeless families with children.

McKinney-Vento Homeless Assistance Grants

The largest federal investment in homeless assistance, and is responsible for funding many local shelter and housing programs.

U.S. Department of Housing and Urban Development

Established in 1965, HUD's mission is to increase homeownership, support community development, and increase access to affordable housing free from discrimination. To fulfill this mission, HUD will embrace high standards of ethics, management and accountability and forge new partnerships — particularly with faith-based and community organizations — that leverage resources and improve HUD's ability to be effective on the community level.

Appendix F: Surveys
 A: In-Person Interview

Unsheltered Count Form for Morning of Count

Location (PLEASE BE SPECIFIC-street corners/address): _____ City: _____
 Interviewer: _____ Date: _____ Time: _____ AM/PM

Hello, my name is _____ and I'm a volunteer for the *Homeless Street Count*. We are conducting a survey to count homeless people to provide better programs and services to them. Your participation is voluntary and your responses to questions will not be shared with anyone outside of our team. I need to read each question all the way through. Can I have about 10 minutes of your time?
 Yes → [GO TO Q1] No → [THANK RESPONDENT AND GO TO OBSERVATION TOOL]

<p>1. Where did you sleep last night? [DO NOT READ CATEGORIES. SELECT ONLY ONE CATEGORY.]</p>	<p>1. Street or sidewalk 2. Vehicle (car, van, RV, truck) 3. Park 4. Abandoned building 5. Bus, train station, airport 6. Under bridge/overpass 7. Woods or outdoor encampment 8. Other location (specify) → _____</p>	<p>9. Emergency shelter 10. Transitional housing 11. Motel/hotel 12. House or apartment 13. Jail, hospital, treatment program 14. At friend or family Members home.</p>	<p>Thank respondent and END SURVEY.</p>
<p>2. Did another volunteer or survey worker already ask you these same questions about where you stayed last night?</p>	<p><input type="checkbox"/> Yes → [end survey] <input type="checkbox"/> No <input type="checkbox"/> Don't know <input type="checkbox"/> Refuse</p>		
<p>3. Including yourself, how many adults and children are there in your household, who slept in the same location with you last night? *IF the group is a family, ask if they have been to the FAMILY HOUSING HUB</p> <p><input type="checkbox"/> Yes <input type="checkbox"/> No</p>	<p>_____ Adults (Age 18 and older) _____ Children (Age 17 and younger)</p>
