The following item was inadvertently left out of the agenda. Please contact the MAG office if you have any questions regarding this addendum to the agenda.

6A. FY 2016 East Valley Congestion Map Project - Redefining Coverage Area

A CMAQ funded project has been programmed in FFY2016 to install 91 Bluetooth detection devices throughout the East Valley to monitor traffic speeds and travel times. This project involved the cities of Mesa, Tempe, Chandler and Gilbert with the City Mesa as the lead. The City of Chandler has been removed from the project scope based on a request submitted to MAG. The remaining three cities have requested to add more detection devices in their cities to maintain the original total of 91 detection sites for the same overall project cost.

**COMMITTEE ACTION REQUESTED**

6A. For information, discussion and possible action to recommend redefining the project scope as adding a total of 91 Bluetooth devices in the cities of Mesa, Tempe and Gilbert.
