

Building Landmark Inventory (BLI) and Multiple Location Employer (MLE) Databases

The BLI and MLE inventory databases are developed to provide unified building and employment information for effective socioeconomic modeling and transportation modeling inputs.

The BLI database contains lists of known employment locations that are often difficult to identify from sources of employer data and are often misrepresented/subdivided by building, parcel and land use data.

The MLE database contains lists of known employers that operate multiple locations.

Building Landmark Inventory (BLI) Categories

BLI Category Number	CategoryName	Subcategory	Size Units	Description (examples)
1.1	Regional Retail	Major Shopping Center	Square feet	Shopping malls, power centers
