

October 9, 2013

TO: MAG Public Works Directors

CC: Specifications and Details Committee

FROM: Gordon Tyus, MAG Specs and Details Staff Support

SUBJECT: TRANSMITTAL OF RECOMMENDED 2014 REVISIONS TO THE MAG SPECIFICATIONS AND DETAILS FOR PUBLIC WORKS CONSTRUCTION - 2012 EDITION

Attached is the summary package of the 2014 revisions to the 2012 Edition of the MAG Specifications and Details for Public Works Construction. This packet is the culmination of a year's work by the MAG Specifications and Details Committee and was recommended for review by all MAG agencies. Member agencies are requested to review this package and forward any comments to me by **November 13, 2013**.

This packet is being provided for review by MAG member agency Public Works Directors for a period of 30 days. Members of the MAG Management Committee and Regional Council will also review the summary information at their November 6 and December 4 meetings, respectively. During this time, if any objections are received following these reviews, each objection will be considered by the Chair of the Specifications and Details Committee as a possible case for consideration during next year's process.

These materials are also available on the MAG website at the following link:
<http://www.azmag.gov/Events/Event.asp?CMSID=5589>

Twenty-six cases were considered in 2013, including one case carried over from 2012. Of these, twenty-three were approved, and three cases were deferred to continue work in 2014. It is anticipated that the annual update package, as well as updated books will be available online and for purchase in early January, 2014. This packet includes a summary of cases, voting and attendance records, and draft updates with the revised specifications and details drawings available for review.

Please contact me at (602) 254-6300 or by e-mail at gtvus@azmag.gov if you have questions regarding the attached package.
