

**ATTACHMENT # 8**  
**August 18, 2004 Building Codes Committee Meeting**

The International Residential Code (IRC) does not have the weep screed requirement that the Uniform Building Code (UBC) did in Section 2506.5. The ICBO ES Report (ER-3899) for Western 1-Kote Exterior Stucco System requires only that weep screeds comply with the UBC Section 2506.5. Does this termination of an exterior stucco system meet the requirements of the IRC?

**Typical Wall Section**
