7. Update on Maricopa County Fugitive Dust Control Rules

The Maricopa County Fugitive Dust Control Rules are key measures for reducing particulate matter in the Revised MAG 1999 Serious Area Particulate Plan for PM-10 and the new Salt River PM-10 State Implementation Plan Revision. The rules cover rock products processing plants and a variety of dust sources. Presentations have been given to the Management Committee and to the Regional Council Executive Committee. Following the Executive Committee meeting, the Chair of the Regional Council sent a letter to the Maricopa County Board of Supervisors urging them to hire 25-30 additional inspectors as recommended by the Environmental Protection Agency. An update will be presented on the efforts needed by all agencies to address the issue.

7. Information, discussion and possible action.
