ABOUT THE RSP

The MAG Roadway Safety Program (RSP) was initiated by MAG to supplement the state's Highway Safety Improvement Program (HSIP) program. The RSP assists with providing additional funding in the short term. MAG facilitates a Highway User Revenue Fund (HURF) swap and regional safety program that can improve the safety conditions of our roadways in all areas, from rural to dense urban. MAG developed this program to address these critical regional funding needs in the near term.
