

Contact Information	
1. Lead Agency	CITY OF CHANDLER
2. Contact Name	SRINI GOUNDLA
3. Phone	480-782-3481
4. E-Mail Address	SRINIVAS.GOUNDLA@CHANDLERAZ.GOV
5. Mailing Address	215 E BUFFALO ST MS-402 CHANDLER AZ 85225

CMAQ Data	
This part of the form is used to gather project related data to calculate an CMAQ Score and also gather the minimum data needed for a listing of the project in the Transportation Improvement Program.	
Federal Funding Eligibility	
All ITS projects to be funded with Federal CMAQ funds must be located within a nonattainment area. Please use the map provided in the tab named "Map" to verify that the project is located in a nonattainment area.	
1. Traffic Estimate and Roadway Characteristics	
a. Current Average Daily Traffic (ADT) on the facility or the nearest parallel facility of a similar facility type:	25,000
b. Please describe how the ADT was estimated:	The ADT was estimated based on the traffic counts on the roadways within the proposed project area.
c. When was the ADT estimate developed:	2018
d. Name of the roadway section used for the ADT estimate:	McQueen Rd, Cooper Rd, Chandler Blvd, Pecos Rd, Germann Rd
e. Starting limit of the roadway section:	McQueen Rd - Chandler Blvd to Germann Rd, Cooper Rd - Chandler Blvd to Germann Rd, Chandler Blvd - Alma School Rd to Gilbert Rd, Pecos Rd - Arizona Ave to Gilbert Rd, Germann Rd - Arizona Ave to Gilbert Rd.
f. Ending limit of the roadway section:	See above
g. Length (miles):	14
h. Total number of through lanes on the roadway section:	6
i. Federal Functional Classification of the roadway section:	Principal Arterial - Other
	Link to ADOT Functional Classification Maps

CMAQ Data

2. Improvements in Traffic Management & Operations

a. Enter the pre-improvement (current) average corridor traffic speed:

b. In the table, check the box that best describes the project (Check only one box):

	Before (pre-improvement) condition	After (post-improvement) condition	Expected increase in speed
<input type="checkbox"/>	Interconnected, pre-timed signals with old timing plan	Advanced computer-based control	17.5 percent
<input type="checkbox"/>	Non-interconnected signals with traffic-actuated controllers	Advanced computer-based control	16.0 percent
<input checked="" type="checkbox"/>	Interconnected, pre-timed signals with actively managed timing	Advanced computer-based control	8.0 percent
<input type="checkbox"/>	Interconnected, pre-timed signals with various forms of master control and various qualities	Optimization of signal timing plans. No change in hardware	12.0 percent
<input type="checkbox"/>	Non-interconnected, pre-timed signals with old timing plan	Optimization of Signal Timing Plans	7.5 percent

NOTE: All ITS projects MUST involve eligible infrastructure improvements.

3. Other Improvements (Check all that apply)

- Traffic signal system improvements at a single agency
- Traffic signal system improvements that apply to more than one agency
- Includes improvements to coordination between arterial and freeway traffic operations
- Project conforms to local land use plans
- Adds features to traffic signals that would better accommodate seniors at pedestrian crossings

4. Traffic Flow Improvement Due to Project (Not required for Traffic Mgmt & Operations Improvements)

a. Enter the pre-improvement (current) average traffic speed of the corridor: (populated from #2a)

b. Enter the post-improvement average traffic speed of the corridor:

ITS Project Information

Enter information in highlighted cells ONLY. Links to various websites are provided for additional information and help.

1. Project Title & Sponsor

a. Project Title	East Chandler ICM Detection, CCTV and Communication Systems
b. Lead Agency	CITY OF CHANDLER
c. Other Partnering Agencies	NONE

2. Project Type

Prioritize SMO Buckets for the funding application

First Priority	Bucket #1 – ICM Corridors
Second Priority	Bucket #3 – Local Priority Corridors
Third Priority	(Please Select a Bucket)

3. Project Goals & Objectives

a. Project Goals	Provide and expand capabilities for the Integrated Corridor Management with required vehicle detection, monitoring capabilities including CCTV and improved communication to the TMC and regional operations with managed/secured gigabit switches. Add data collection capabilities including collection of the turning movement counts. Provide the ability to detect bicycle traffic and safely accommodate bicyclists at signalized intersections. Provide additional minimum green time and green extension only when bicycles are present and therefore reduce delays for vehicles, increase the bicycle use and reduce vehicle trips.
b. Project Objectives	Install video detection system (26 intersections), CCTV cameras (8 intersections) and communication equipment (11 locations) to provide efficient bicycle and vehicle detection, monitoring capabilities and reliable communication systems.

4. Project Information

a. Project location description	McQueen Rd - Chandler Blvd to Germann Rd, Cooper Rd - Chandler Blvd to Germann Rd, Chandler Blvd - Alma School Rd to Gilbert Rd, Pecos Rd - Arizona Ave to Gilbert Rd, Germann Rd - Arizona Ave to Gilbert Rd. Note: a PDF file of a map must be submitted to MAG as an attachment.
b. Scope of the project	Install video detection systems (26 intersections), CCTV cameras (8 intersections) and communication equipment (11 locations) to provide efficient bicycle and vehicle detection, monitoring capabilities and reliable communication systems. The field installation, wiring and configuration will be completed by City employees and is not counted as part of the project cost.

ITS Project Information

5. Identify Project Components in MAG Regional ITS Architecture

Service Area	Addressed in this Project? <small>(Dropdown: Y/N)</small>	Applicable ITS Service Packages
Traffic Management	Yes	ATMS03, ATMS01
Maintenance and Construction		
Public Transportation		
Traveler Information		
Emergency Management		
Archived Data Management		

NOTE: Insert the relevant ITS Architecture flow diagram in the "ITS Architecture" worksheet.

6. Quantitative Criteria

Enter Quantitative Criteria for Bucket(s) selected in Section 2 "Project Type"

Average Daily Traffic (ADT) from 'CMAQ Data' tab in this funding application.	
Crashes Per Mile Per Year (MAG Will Complete)	
Maximum Peak Period Travel Time Index (MAG Will Complete)	
Percentage network communication connectivity to traffic signals & ITS devices.	85%
Regional Priority Corridor Ranking (Enter shares of work in "Regional Priority - Top 100")	
Latest year of your agency's Operations/Management Center upgrade.	2017

7. Program Year Preference

Preferred Program Year 2021

ITS Project Information				
8. Project Budget by SMO Strategy				
Strategies for Bucket #1 – ICM Corridors	Federal Cost	Local Match (min 5.7%)	Total Cost	Share of Total Project
2-Real-time CCTV monitoring capabilities at all major-major arterial intersections on ICM corridors	\$ 45,264.00			6%
3-Vehicle and pedestrian actuated detection at all signalized intersections to support signal operations and real-time collection of data collection, including data on turning movement counts	\$ 661,986.00			88%
11-Regional Asset Upgrade/Replace Program - ICM Corridors & Priority Arterials	\$ 41,492.00			6%
Total	\$ 748,742.00	\$ 45,258.00	\$ 794,000.00	100%
Cost Percentage	94.3%	5.7%		
Strategies for Bucket #2 – Regional Priority Arterials	Federal Cost	Local Match (min 5.7%)	Total Cost	Share of Total Project
8-Real-time visual monitoring capability at all major-major intersections on Priority Arterials				
9-Additional detection at signalized intersections for real-time collection of data, including turning movement counts stored by individual agencies and archived in RADS				
10-Reliable communications between TMCs and major-major intersections to facilitate remote management of traffic operations - Adds both fiber and wireless infrastructure				
11-Regional Asset Upgrade/Replace Program - ICM Corridors & Priority Arterials				
Total				
Cost Percentage				
Strategies for Bucket #3 – Local Priority Corridors	Federal Cost	Local Match (min 5.7%)	Total Cost	Share of Total Project
12-Local priority ITS projects	\$ 748,742.00	<input checked="" type="checkbox"/> Yes, the agency intends to follow		100%
Total	\$ 748,742.00	\$ 45,258.00	\$ 794,000.00	100%
Cost Percentage	94.3%	5.7%		

ITS Project Information

9. System Maintenance and Operations

a. Current staff resources available to support ITS operations at the local agency (in FTEs)	10
b. Additional staff resources required for fully utilizing features added by project (in FTEs)	0
c. Agency's estimated current annual ITS operations & maintenance (O & M) budget	1.5 Million
d. Estimated additional annual O & M funds required for features added by this project	\$0
e. Estimated DATE from when required additional local O & M funds will be available	Jul-20
f. Other comments	

10. Systems Engineering Analysis Requirement

Commitment to address the federal requirement for Systems Engineering Analysis:
 Agency's intent to follow the process described in the 'V' diagram during the project development process.
[ADOT Systems Engineering Checklist](#)

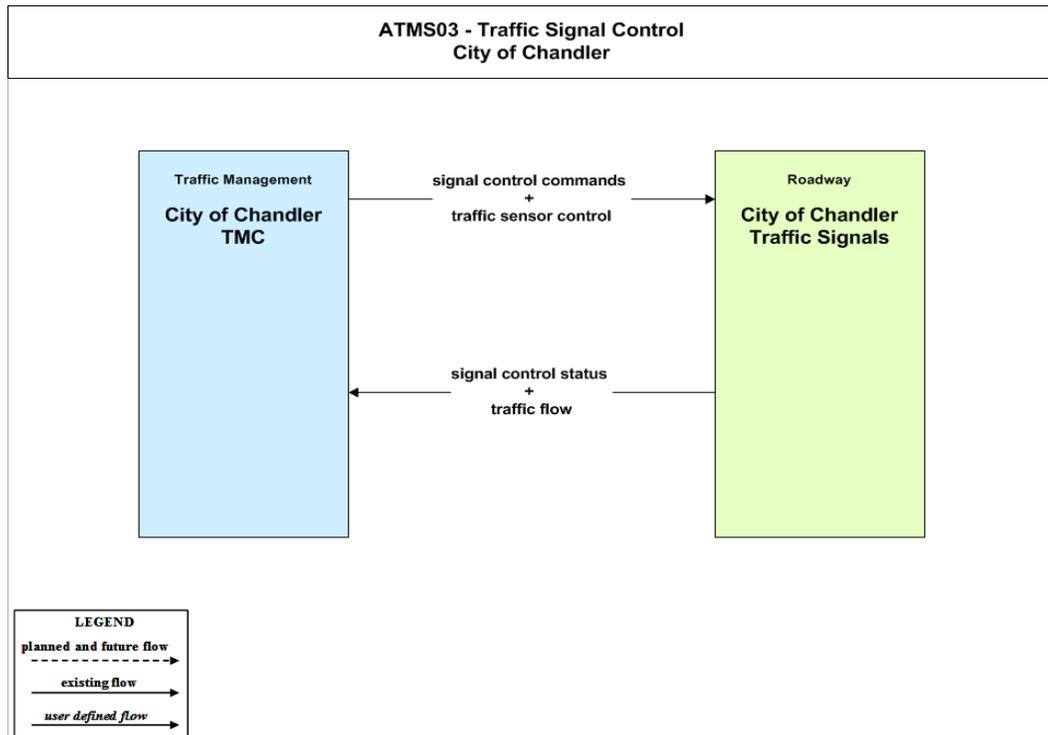

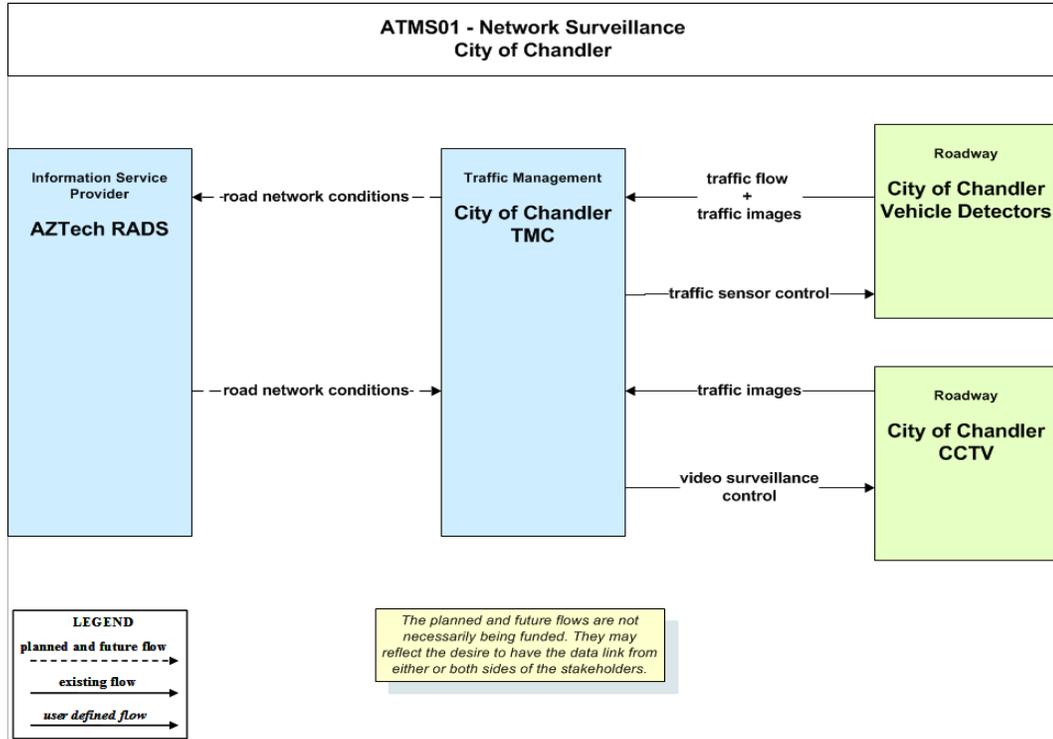

The project sponsor/lead agency of this application intends to incorporate the Systems Engineering Analysis in the project's scope of work, following guidance on the ADOT's System Engineering Checklist.

ITS Architecture Flow Diagram

All relevant ITS Architecture Flow Diagrams MUST be inserted below for the relevant ITS Service Packages addressed by the proposed ITS project. This is to ensure that the project complies with the Regional ITS Architecture and meets a federal requirement for all federally funded ITS projects.

Find the relevant Service Packages addressed by the project in the MAG ITS Architecture (found in the link below). Copy and paste the graphic in the space provided.

[MAG Regional ITS Architecture](#)
