Please provide a short narrative. Be specific about how this project will benefit people with disabilities. Include in the description the significance of the project to the participating agency(s).

This project improves 24 highly patronized bus stops within the city of Peoria to meet the requirements of the American's with Disabilities Act (ADA). Peoria intends to upgrade the proposed stops to include general bus stop street access, boarding and alighting landing pad improvements, bus shelters at the highest boarding stops, and trees for additional shade. The proposed bus stop locations and deficiencies were identified utilizing the Valley Metro Accessibility Assessment Plan. Published Valley Metro ridership data was used to determine bus stop ridership. The proposed bus stops for improvement are located where appropriate and most needed, and any shade improvements will benefit all transit users. If approved, this project will enhance accessibility to vital transit services, as well as improve the safety and convenience for patrons at these locations. Consequently, it will also have a positive impact on ridership.
