Please provide a short narrative. Be specific about how this project will benefit people with disabilities. Include in the description the significance of the project to the participating agency(s).

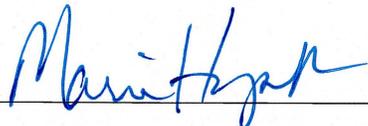

The project improves 11 priority bus stops identified by the Street Transportation and Public Transit Departments within Phoenix to meet the requirements of the American with Disabilities Act (ADA) in our FY18/19 Mobility Improvement 5-year plan. General bus stop street access, boarding and de-boarding landing pad improvements, bus shelters at the highest boarding stops, and shade trees at areas where right-of-way is limited is Phoenix's set plan to upgrade the proposed stops. The proposed bus stops for improvement are located where most needed, and any shade improvements will benefit persons with disabilities, as well as all other transit users. All 11 stops will be improved with sidewalk as all 11 locations are currently in dirt and in some cases, curb, gutter, paving and upgraded ADA ramps will also be required to meet the requirements for ADA compliance. These stops will require little to no design and will be job order contract (JOC) constructed.
