

Company Overview

Company Profile

- Founded in 2001; launched first product in 2004 with co-promotion partner
- Created Primus sales force in Fall 2005
- Headquartered in Scottsdale, Arizona

Mission

As people age, they often develop chronic diseases and rely on synthetic prescription drugs for relief. Unfortunately, these medicines usually only mask symptoms, without addressing the underlying disease, and can cause serious and dangerous side effects.

At Primus, we think differently. We discover and develop natural prescription medicines that are proven to work with an unmatched safety profile. Our medicines unlock the potential of natural molecules that work at the cellular level to regulate, rebalance and restore the body's normal, healthy processes. We give the body what it needs. No synthetic chemicals – just natural pharmaceutical-grade ingredients that make people feel better. It's medicine the way it is supposed to be.

The Role of Prescription Medical Foods

Primus develops prescription medical foods, which are medicines regulated by the U.S. Food and Drug Administration (FDA) as a distinct category from drugs or dietary supplements. Medical Foods are intended for the dietary (metabolic) management of a disease, and their effectiveness must be proven by sound laboratory and clinical science.

- Primus medical foods have earned the highest standard of safety at the FDA; the ingredients have been designated "generally recognized as safe" (G.R.A.S.)
- Unlike drugs, prescription medical foods generally do not cause severe adverse events or dangerous drug-on-drug interactions

Commitment To Access

We believe everyone deserves to know about natural prescription choices. We're doing our part through research, education and support programs that ensure patient access to our medicines. Together we can make health a higher priority.

We also offer Primus Care Direct, a hassle-free, mail-order pharmacy service. Our brands are available at retail pharmacies, but with Primus Care Direct there is no need for call backs or prior authorizations. Patients are guaranteed the lowest price and convenient home delivery.

Therapeutic Categories

Rheumatology	Podiatry
Orthopedics	Obstetrics/Gynecology
Dermatology	Pain Management
Primary Care	Vascular Health (Phlebology)

FosteumPLUS® – Better, Stronger Bones

FosteumPLUS is a prescription medical food and all-in-one, bone-building system that provides ingredients that safely and effectively build quality bone.

- Contains genistein, zinc, calcium, phosphate, Vitamin K2, and Vitamin D in a single capsule, reducing the need for additional vitamins
- Provides both the ingredients to build quality bone (calcium and phosphorus) and the mechanisms needed to induce bone turnover
- Is the only prescription medicine that contains Vitamin K2, which carries calcium out of the arteries and delivers it to the bone (reducing atherosclerosis)

Limbrel® – Mobility without Compromise

Limbrel is a prescription medical food that enhances mobility by balancing multiple inflammatory pathways to relieve joint discomfort with fewer side effects compared to traditional therapies.

- Works to restore the body's equilibrium – reducing the physical discomfort and limitations caused by OA
- Proven in clinical studies to be effective in safely managing the unique nutritional needs of osteoarthritis

Rheumate® – Living Better with RA

Rheumate is a prescription medical food that counteracts side effects from methotrexate, a medication used to manage rheumatoid arthritis.

- Provides an all-in-one solution that replenishes folate depleted by methotrexate and restores the body's balance
- Works by delivering a biocompatible form of folate (L-5-methyltetrahydrofolate) that doesn't need to be converted by the body, unlike folic acid supplements
- Contains vitamin B12 and curcumin – an antioxidant powerhouse that combats oxidative stress

Vasculera® – Don't Suffer in Vein

Vasculera is a prescription medical food containing purified diosmin, a flavonoid that restores the body's microcirculatory balance.

- Delivers highly-purified diosmiplex, a proprietary blend which contains a flavonoid isolated from hesperidin found in citrus and Alka4 complex to counter acidity in the blood
- Supported by 50 published and peer-reviewed clinical studies that show diosmin is effective and safe in managing chronic venous disease (CVD)
- Helps manage underlying causes of varicose veins, spider veins, edema, lymphedema, traveler's edema, stasis dermatitis, venous ulcers, and chronic hemorrhoids
