

Mapping Hard to Count (HTC) Communities for a Fair and Accurate 2020 Census

You can use the map to:

- **Prioritize hard-to-count communities for your Get Out the Count campaign**
 - You can zoom to any area in the country and the map will highlight the local hard-to-count tracts and provide details about how much of the area's population may be at risk of an undercount. You can also view local resources in hard-to-count areas such as public library branches.
- **Search by address, ZIP Code, landmark, county, state, or legislative district**
 - The map color-codes the hardest-to-count tracts in the country. You can click on or tap any tract (or search by address) to find out important population information, such as:
 - How many households mailed back their census questionnaire in 2010 (i.e., how much of the tract **may require more costly in-person follow up** by the Census Bureau in 2020); and
 - How much of the tract is populated by groups that are **at risk of being undercounted**, such as children under 5, households with poor internet access, recent immigrants, and more.
- **Enhance your educational campaign supporting an adequate Census budget**
 - When you search for a district, the information panel to the left of the map provides contacts for each congressional & state representative and US Senator.
