

Agency:	Phoenix		Title of Project:	27th Ave/Camelback Rd Signal & Lighting Improvements	
Date:	9/2/2020				
Contact Name and Title:		Phone:	E-Mail:		
Carl Langford		602-262-4613	Carl.langford@phoenix.gov		
Roadway Safety Program (RSP) Project Scope					
1.	Describe your safety improvement project in detail: (50 words or less)				
1a.	The project will upgrade all existing signals as part of a complete intersection rebuild at 27th Avenue and Camelback Road. First countermeasure uses CMF 1430, Improve visibility of signal heads. Second countermeasure is a flashing yellow arrow installation; CMF 7695 for all crashes. Third countermeasure is CMF 441, Intersection Illumination.				
2.	Describe the project location, include pertinent demographic and land development information:				
2a.	The signal rebuild project is located at the intersection of 27th Avenue and Camelback Road. This intersection serves many users that includes commercial businesses, restaurants, outdoor shopping centers, and residential communities. Interstate 17 is located approximately 1/4 mile east of the intersection.				
3	For projects on State System (ADOT):	BMP: (Begin Milepost)		EMP: (End Milepost)	
4.	What network screening method was used to identify this project?			<input type="checkbox"/> MAG <input type="checkbox"/> ADOT <input checked="" type="checkbox"/> Other (Below)	
4a	Conducted a Roadside Safety Assessment(RSA) for the City of Phoenix				
5.	Was this project identified as a recommendation in a study? If so, what kind? (check all that apply)				
5a	<input checked="" type="checkbox"/> RSA <input type="checkbox"/> PA <input type="checkbox"/> SRTS Study <input type="checkbox"/> LASS Study <input type="checkbox"/> Other				
6.	Was the project identified using an agency adopted predictive safety analysis?			<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO	
7.	What is the safety justification for the proposed project?				
7a	The intent of installing additional signal heads, upgrading signal lens size, installing new backboards, and using larger signal heads is to provide greater visibility and compliance to the traffic signal. The MUTCD Chapter 4D.11 states on approaches with two or more lanes for the through movement, one signal face per through lane, centered over each through lane has also been shown to provide safer operation. In Changing the signal timing phasing from protected/permissive to a flashing yellow arrow(FYA) typically reduces left-turn collisions. The additional lighting at the intersection is intended to improve the visibility of bicyclists and pedestrians.				
8.	Is Public outreach required for your project? If "yes" Provide what was done, the date(s) and outcomes. (Attach documentation if applicable)				
8a	No public outreach is required for this project.				
9.	What safety related public education will your agency be providing before placing the safety improvement in service, if applicable?				
9a	There will be no safety related public education for this project.				
10.	Equity: Input the largest percent for each element for the one-mile radius or offset (Click on the hyperlinks in the text to open maps. See directions on side on maps):				
	65 yrs and Older	Minority Groups	No Vehicle Households	Disabled	Living in Poverty
10a	22	45	40	15	51
11.	Avg Daily Traffic (ADT) Volume:		62808	Year Collected:	
				2016	
12.	Total Crash Frequency:		304	Crash Rate (MVM or MEV) (Insert from "Crash Rate" Work Sheet):	
				2.7	
13.	What is the posted speed limit?		40	Benefit/Cost:	
				15.2	

PROJECT COST ESTIMATE WORKSHEET
(Cost Estimates Are Required Regardless of Programming)

PROCUREMENT	REQUESTED PROGRAMMING	Location Description	Intersection at 27th Avenue and Camelback Road
